The revered teacher and bestselling author of such classic Christian works as Mere Christianity and The Screwtape Letters, C. S. Lewis here offers wisdom and lessons that illuminate our private dialogue with God—prayer—in this collection drawn from the breadth of his writings. C. S. Lewis’s insights on Christianity and his reflections on Christian life continue to guide us more than fifty years after his death. How to Pray showcases Lewis’s enduring wisdom on prayer and its place in our daily lives. Cultivated from his many essays, articles, and letters, as well as his classic works, How to Pray provides practical wisdom and instruction to help readers nurture their spiritual beliefs and embrace prayer in all its forms. While many people would like to speak to God, they often don’t know how to begin. Lewis guides them through the practice, illuminating the significance of prayer and why it is central to faith. A welcome addition to the C. S. Lewis canon, How to Pray offers a deeper understanding of our personal tradition of prayer, our

Noted music educator Bennett Reimer has selected 24 of his previously published articles from a variety of professional journals spanning the past 50 years. During that time, he's tackled: -generating core values for the field of music education; -the core in larger societal and educational contexts; -what to teach and how to teach it effectively; -how we need to educate our teachers; -the role of research in our profession; and -how to improve our future status. Reimer precedes each essay with background reflections and his position, both professional and personal, on effectively addressing the issue at hand. The opening 'Letter to the Reader' presents a valuable overview based on his deeply grounded viewpoint. The entire music education profession will benefit from Reimer's perspective on past, present, and future concerns central to the functioning of music education in *Seeking the Significance of Music Education: Essays and Reflections*. The twenty nine essays in this book are insightful and sympathetic analyses of various facets of Gandhi's multidimensional personality. They cover his formative years, his struggle against racism and imperialism, his attitude to religion and the partition of India, his public life, and the relevance of his political economic thought in the twenty-first century. This book will be of interest to political scientists, historians, followers of Gandhi, and an informed general audience. Benjamin Tilghman has been a leading commentator on analytic philosophy for many years. This book brings together his most significant and influential work on aesthetics. Spanning a period of thirty years and covering topics in aesthetics from literature to painting, the collection traces the development of

Tilghman's two principal themes; a rejection of philosophical theory as a way of resolving problems about our understanding and appreciation of art and the importance of the representation and presentation of the human and human concerns in art. Tilghman is profoundly influenced by the philosophy of Ludwig Wittgenstein and his work is informed throughout by his conception and practice of philosophy. Written with exceptional clarity and with many references to original work in both painting and literature, this collection will be an invaluable resource not only for professional philosophers but for those working in the arts generally, art historians, critics and literary theorists. The environmental classic that redefined the way we think about the natural world—an urgent call for preservation that's more timely than ever. "We can place this book on the shelf that holds the writings of Thoreau and John Muir."—San Francisco Chronicle These astonishing portraits of the natural world explore the breathtaking diversity of the unspoiled American landscape—the mountains and the prairies, the deserts and the coastlines. Conjuring up one extraordinary vision after another, Aldo Leopold takes readers with him on the road and through the seasons on a fantastic tour of our priceless natural resources, explaining the destructive effects humankind has had on the land and issuing a bold challenge to protect the world we love. With their

This long-awaited collection of literary and cultural essays offers evidence of how much the fully engaged critical mind can contribute to the reservoir of value, thought, and action essential to our lives and culture. With their powerful blend of political and aesthetic concerns, Edward W. Said's writings have transformed the field of literary studies. This long-awaited collection of literary and cultural essays offers evidence of how much the fully engaged critical mind can contribute to the reservoir of value, thought, and action essential to our lives and culture. This collection of gem-like reflections distills the most popular messages the author has delivered, along with responses from his hearers. He describes the basic routes by which people travel on their mystical quests, including controlled breathing, quiet sitting and reciting mantras--methods that lead to states of "non-thinking" that may produce lucid, even life-transforming insights. A new collection of prophetic essays from one of the sharpest practitioners of the form Mark Slouka writes from a particular vantage point, one invoked by Thoreau, who wished "to improve the nick of time . . . to stand on the meeting of two eternities, the past and future." At this bewildering convergence, Slouka asks us to consider what it means to be human and what we must revive, or

reject, in order to retain our humanity in the modern world. Collected over fifteen years, these essays include fascinating explorations of the relationship between memory and history and the nature of "tragedy" in a media-driven culture; meditations on the transcendent "wisdom" of the natural world and the role of silence in an age of noise; and arguments in defense of the political value of leisure time and the importance of the humanities in an age defined by the language of science and industry. Written in Slouka's supple and unerring prose, celebratory, critical, and passionate, Essays from the Nick of Time reawakens us to the moment and place in which we find ourselves, caught between the fading presence of the past and the neon lure of the future. One of the world's leading Descartes scholars explores central areas of his philosophy, including his views on the nature of thought, the relationship between mind and body, his scientific worldview and its influence on modern thinking, the place of God in his philosophical system, and his account of the emotions and the good life. In this thoughtful collection of interviews and essays, Michael White extends upon his explorations of the narrative metaphor in therapy. Thorough explorations of the thinking that informs narrative practice are interwoven with stories of therapeutic conversations shared. For those readers who are already engaged with narrative therapy, this collection will provide further food

for thought. A series of in-depth examinations of the motion picture many consider to be Hollywood's finest western film. In this collection of papers and lectures from the late Rainette Frantz, we witness firsthand the exhilarating possibilities inherent in the Gestalt therapy model. Frantz brings her background in theater to bear on her remarkable work as a therapist and teacher-work marked by delightful imagination, striking improvisation, and aesthetic beauty. The insights contained in these chapters illuminate everything from the intricacies of an opening session to the theoretical foundations of Gestalt dreamwork, and Frantz's candid style invites the reader to explore with her the joys and sorrows of a career as a Gestalt therapist. In forty-three brief essays from the life of a philosopher, Charles Taliaferro guides us toward the heart of human being in all of its absurdity and joy. Electrocuted by his coffee maker during class, battling dragons on his rooftop, and accompanying his father to the border between life and death, Taliaferro recommends to us a life vulnerable to silliness, pain, and the depths of love they create in us. Hilarious and sobering, *Love, Love, Love* investigates what we need most to live humanely, humorously, faithfully, and well. In the essays collected here Gilbert Meilaender invites readers to reflect upon some of the bioethical issues that are important for all of us. The essays treat bioethics less as a discipline confined to a few experts than as a

deeply humanistic set of concerns that inevitably draws us into religious and metaphysical issues. From reflections on his experience as a member of the President's Council on Bioethics to the way in which Christian trinitarian teaching has shaped what it means to be a person, from life's beginning to its ending, these essays offer readers a chance to think about matters of fundamental human significance. An Examined Life is a collection of writings from politician and scholar Karan Singh. There are momentous events here drawn from Jammu and Kashmir's history, as well as essays and letters on subjects ranging from political science to active politics, metaphysics and spirituality to Hinduism as a way of life. The essays, particularly, often anecdotal, feature important figures in contemporary history and offer insight into the years following Independence that set the tone for the world's largest democracy. While his official correspondence with Jawaharlal Nehru over three decades casts light on the political turmoil in Kashmir post accession to India, his letters to Indira Gandhi address a dark period in contemporary history - the 1975 Emergency, and the events before and after. The anthology also contains select poems and excerpts from his travelogues and novel set in Kashmir. Happiness. We spend our life and all our efforts in its pursuit. Yet do we really know what it is and how it occurs? Are we secure in how to achieve

and maintain it? Are we certain that we are maximizing our potential to obtain it? Our answers to these questions may not be as firm as we would like them to be. The principles and strategies we produce or receive from others may not provide the happiness they promise or we desire. We may be able to blame interference or seemingly unchangeable circumstances as causes for this shortfall. But we may also sense that our lack of insight arrests our happiness at levels short of its potential. We are searching, often not even knowing what we are looking for. This book investigates in a thorough manner what happiness is and how we might achieve happiness. It is written as a theoretical and practical guide that does not require prior philosophical training. Striving to cover all facets of human pursuits of happiness, its philosophical considerations include topics of law, economics, political science, sociology, history, anthropology, psychology, biology, and physics. Its inclusive examination reveals happiness as an intensely individual phenomenon as well as a systematic force that shapes human destiny and matters beyond up to a cosmic scale. The book illuminates these subjective and objective functions of happiness. Its insights about the nature of happiness may help us to understand the general subject matters of our search as well as the general terrain and rules by which we must abide in our pursuit of happiness. However, it does not presume to

know what specific objectives and pursuits will make us happy. Rather, it develops, describes, and encourages us to discover tools to find, understand, and define our personal happiness and to pursue the implementation of this vision with optimized preparedness. Its objective is not to indoctrinate but to empower us. The book proposes that humans are generally endowed with all internal constituents and mechanisms to develop their happiness to its fullest possible extent. Unless our faculties are pathologically impeded, we might only have to become aware of these inherent forces to actuate them. Improving our happiness seems to be a function of comprehensively revealing our concept of happiness and permitting it to take its natural place. The mission of the book is to assist in this process. Finding what makes us happy requires that we achieve knowledge of who we are and of what we want. It requires us to be mindful of our wishes, our needs, our personality. Once we understand our motivations, we must arrange and implement them to their best effect in relation to one another, our capacities, other humans, and our nonhuman environment. The book supports us in gaining these insights and in the resulting tasks. The book further examines how much happiness we can expect to obtain even under the best circumstances. It describes external and internal constraints that threaten our achievements. But it also shows perspectives that

may enable us to conquer limitations. Thus, we may not only gain clarity about our happiness but also confidence in its pursuit. Visit the book website with the same name to learn more. "Harper Lee's Pulitzer Prize-winning novel *To Kill a Mockingbird* remains one of the most enduring works of southern fiction ever written. Although a literary phenomenon - tens of millions of copies have sold worldwide - there is surprisingly little secondary literature on Lee and her only novel. *On Harper Lee: Essays and Reflections* is the first collection of original essays on the author and her magnum opus. Written for scholars as well as general readers, *On Harper Lee* is an accessible collection on one of America's most important novels and its often enigmatic creator. Alice Hall Petry is professor of English at Southern Illinois University, Edwardsville. She is the author of *A Genius in His Way: The Art of Cable's Old Creole Days* and *Understanding Anne Tyler*, and the editor of *Critical Essays on Kate Chopin*". "This 449-page collection of essays on the life of the famous (or infamous?) George Ivanovitch Gurdjieff could serve as the definitive tome on the eccentric and enigmatic teacher." In the spiritual language of the 20th century few names raise such varied reactions as that of George Ivanovitch Gurdjieff (1866-1949). Much of what is considered New Age spirituality can be attributed to Gurdjieff. This book is a tribute not only to the scope and power of Gurdjieff's

ideas, but to the special "atmosphere" that surrounded his work with pupils. Views from one of the most original cultural critics of the twentieth century, Walter Benjamin

Over the last decade, author and activist Astra Taylor has helped shift the national conversation on topics including technology, inequality, indebtedness, and democracy. The essays collected here reveal the range and depth of her thinking, with Taylor tackling the rising popularity of socialism, the problem of automation, the politics of listening, the possibility of rights for the natural and non-human world, the future of the university, the temporal challenge of climate catastrophe, and more. Addressing some of the most pressing social problems of our day, Taylor invites us to imagine how things could be different while never losing sight of the strategic question of how change actually happens. Curious and searching, these historically informed and hopeful essays are as engaging as they are challenging and as urgent as they are timeless. Taylor's unique philosophical style has a political edge that speaks directly to the growing conviction that a radical transformation of our economy and society is required.

Jia Tolentino is a peerless voice of her generation, tackling the conflicts, contradictions, and sea changes that define us and our time. Now, in this dazzling collection of nine entirely original essays, written with a rare combination of give and sharpness, wit and fearlessness, she delves into the forces that warp our vision, demonstrating an unparalleled stylistic potency and critical dexterity. Trick Mirror is an enlightening, unforgettable trip through the river of self-delusion that surges just beneath the surface of our lives. This is a book about the incentives that shape us, and about how hard it is to see ourselves clearly through a culture that revolves around the self. In each essay, Tolentino writes about a cultural prism: the

rise of the nightmare social internet; the advent of scamming as the definitive millennial ethos; the literary heroine's journey from brave to blank to bitter; the punitive dream of optimization, which insists that everything, including our bodies, should become more efficient and beautiful until we die. Gleaming with Tolentino's sense of humor and capacity to elucidate the impossibly complex in an instant, and marked by her desire to treat the reader with profound honesty, Trick Mirror is an instant classic of the worst decade yet.

The Souls of W. E. B. Du Bois is a collection of articles that treat Du Bois on the subject of religion by reintroducing his life and work to an audience that may be familiar with his work generally but may never have seen analyses of his study of religion. Because the project includes articles that examine both Du Bois's personal religious life along with his examination of religion, the editors seek to add not only to our knowledge of Du Bois's scholarly contributions but also hope to shed light on his personal life and religiosity. Also, in treating the biography and career of a thinker whose work covers much of the twentieth century, the editors intend this work to address larger issues related to religion in the United States over the course of the century. The colleagues and former students of John Staddon, the last of the Skinnerian

behaviourists, discuss topics that have been important in his work: behavioural ability and choice, memory, time and models, and behaviourism. Contributor R.H.I. Dale from Macquarie University. Presents a collection of essays discussing the first five years of the pontificate of Benedict XVI, examining his role as a peace advocate for the Middle East, his involvement in environmental issues, and his handling of the sex abuse scandals in the United States and Europe. "This book is just that: reflections of a highly polished mind that uncannily approximate the century's fragments of shattered traditions." — Time A companion volume to Illuminations, the first collection of Walter Benjamin's writings, Reflections presents a further sampling of his wide-ranging work. Here Benjamin evolves a theory of language as the medium of all creation, discusses theater and surrealism, reminisces about Berlin in the 1920s, recalls conversations with Bertolt Brecht, and provides travelogues of various cities, including Moscow under Stalin. Benjamin moves seamlessly from literary criticism to autobiography to philosophical-theological speculations, cementing his reputation as one of the greatest and most versatile writers of the twentieth century. In this mix of memoir, guidebook, and travelogue, a married couple documents the year they took off from work and traveled the world together. Wait for me . . . If so, A Year Off will give you the inspiration and the courage to make it happen in real life.” —The Independent Now, more than ever, the world needs growth-oriented and socially inclusive policymaking. Is the world giving up on the promise of ever-greater prosperity for all, on functioning democratic institutions, and on long-term peace? Is the special set of circumstances that led to the recent rapid growth in emerging markets unlikely to be present in the future? Will the second decade of the twenty first century end with “secular stagnation”? Does the rise of authoritarianism, populism, and fanatic nihilism—all experienced over the last few years—threaten to unravel what has been built painstakingly since the catastrophe of World War II? Kemal Dervis addresses these and similar questions in this thought-provoking series of essays written for Project Syndicate from 2011 to 2015. The essays are organized in three sections: global economic interdependence, inequality and the political economy of reform, and the specific challenge of Europe. The common theme is the need for growth-oriented and socially inclusive policymaking in an

interdependent world. These kinds of policies offer the potential for another wave of unprecedented human progress aided by breathtaking new technologies. However, a huge and destabilizing disruption is possible if policymaking is not globally cooperative and is not focused on inclusion and greater equity. These essays synthesize the experience and analysis of a scholar and policymaker with national, regional, and international experience at the highest levels. Dervis exhibits a passion for combining strongly held values with political feasibility. The college application essay is one of the few opportunities a student has to stand out from other applicants in today's increasingly selective admissions process. This book asks current Harvard University undergraduates to revisit their college applications and compare their perspectives before and after having attended Harvard. What emerges is a fascinating, honest exploration of the ways in which one of the best universities in the country impacts its students. A book for for prospective students and introspective readers alike, What Harvard Really Taught Me shows that no two Harvard experiences are alike. This is a snapshot in time, revealing much about students' motivations, hopes, and dreams. A new translation of philosopher Walter Benjamin's work as it pertains to his famous essay, "The Storyteller," this collection includes short stories, book reviews, parables, and as a selection of writings by other

authors who had an influence on Benjamin's work. "The Storyteller" is one of Walter Benjamin's most important essays, a beautiful and suggestive meditation on the relation between narrative form, social life, and individual existence—and the product of at least a decade's work. What might be called the story of The Storyteller Essays starts in 1926, with a piece Benjamin wrote about the German romantic Johann Peter Hebel. It continues in a series of short essays, book reviews, short stories, parables, and even radio shows for children. This collection brings them all together to give readers a new appreciation of how Benjamin's thinking changed and ripened over time, while including several key readings of his own—texts by his contemporaries Ernst Bloch and Georg Lukács; by Paul Valéry; and by Herodotus and Montaigne. Finally, to bring things around, there are three short stories by "the incomparable Hebel" with whom the whole intellectual adventure began.
