Mental Disorder and Criminal Justice Jan 09 2021 Whilst the health and social care systems in the main treat and support those with mental disorders, the criminal justice system deals with them primarily as offenders, victims or witnesses. This latter approach tends to ignore their mental health needs. The book addresses solving problems in inter-agency working, and in gaining greater awareness of the ways in which people who have a mental disorder are vulnerable within and between both systems, be this in institutional settings or where they are detained by the police. The crucial issues of risk assessment and risk management for people with mental disorders, and diversion from custody, are fully covered. A relatively new and unexamined area of concern within the criminal justice system - that of mentally disordered people who are victims of or witnesses to a crime - is discussed. Each chapter contains helpful summaries and case studies which identify the relevant legal provisions, research evidence and related publications.

Assessing Forensic Mental Health Need May 01 2020

Mentally disordered offenders (MDOs) have dominated the recent political agenda for mental health care emphasised by cases such as those of Christopher Clunis and Michael Stone. Yet successive governments have constrained the development of all health and social services by the requirement that they must be demonstrated as capable of benefiting those to whom they

are applied. This book analyses the development of government policy for services for MDOs since the important Butler report in 1975 and provides a theoretical framework for adjudging research which purports to demonstrate a need and outcome. Finally, it emphasises the subjective and value-laden nature of all needs assessments and their interpretation and poses the crucial questions of whose need it is that we address through MDO services, those of the patient or of society. This book will be valuable to clinicians and researchers working in mental health services, policy-makers, service commissioners and managers. Features: An analysis of the history of the MDO policy in relation to needs assessment pre and post the important Reed Report. A methodological framework for needs assessment of MDOs. Critical appraisal of alternative definitions of needs and of related concepts. Critical analysis of the application of needs assessment methods. A review of research relevant to needs assessment for MDOs. Needs in relation to outcome. An analysis of recent policy development related to MDO services.

Review of Health and Social Services for Mentally Disordered Offenders and Others Requiring Similar Services: The academic & research base Jan 27 2020

Understanding Mentally Disordered Offenders Jan 01 2023
First published in 1997, this volume's purpose is to understand and clarify the nature of implicit theories currently held about the mentally disordered offender by respondents who represent a range of agencies: the general lay population, Criminal Justice, Mental Health and Social Services. The significance of this research rests on the premise that a greater understanding of professional and lay perspectives towards the mentally ill offender will help elucidate conflicting assumptions between agencies which, by their very nature, may be seriously disrupting the effective implementation of a number of key criminological and clinical policy

initiatives involving the care and management of the mentally ill. In particular, consideration is given to the impact such ideological differences may have with regard to the establishment of community-based psychiatric care programmes, the policy of diverting mentally ill offenders away from the Criminal Justice System and into care by Health and Social Services, and the need to strengthen inter-agency co-operation.

Report to the Legislature Jul 15 2021

A Companion Guide to Mentally Disordered Offenders Apr 23 2022 The first edition of this book was welcomed by probation and mental health personnel as an accessible guide to this complex area of law, covering the spectrum of special provision from the mentally disordered suspect at the police station through to the conditional discharge from hospital of restricted patients, including diversion from the criminal justice system, insanity and allied defences, community orders combining treatment and supervision, mentally disordered prisoners, guardianship orders, etc.

Mentally Disordered Violent Offenders Mar 30 2020

Mentally Disordered Offenders Jun 25 2022 Managing the Mentally Disordered Offender presses the case for better health care of mentally disturbed law breakers, and the need to divert them from unnecessary imprisonment. Mentally disordered offenders present particular problems in our society, which wants both to sympathise and to punish. How do we get the balance right between sympathy towards their illness and genuine worries about their offending behaviour? What do we do for – and about – people who have been released from prison yet we suspect continue to pose risks to the safety of others? With specialist contributors from criminology, criminal justice, social work, probation practice and the law, Managing the Mentally Disordered Offender stresses the importance of professional cooperation in community-based services, whilst acknowledging the psychologically

demanding nature of working with mentally disordered people, and their very real challenges of attempting to contain their wrongdoing without recourse to the repressiveness of imprisonment.

California Correctional System's Policies Regarding Parole Release and Mentally Disordered Offenders Jun 13 2021

The Mentally Disordered Offender Jul 27 2022

A Nationwide Survey of Mental Health and Correctional Institutions for Adult Mentally Disordered Offenders Mar 11 2021

Management of the Mentally Disordered Offender in Prisons Apr 11 2021 Management of mentally disordered offenders (MDOs) is a major challenge for the clinician, because they have multiple problems and diagnoses, and the cost of a mistake can be very high. The author, former director of psychiatric services at the Regional Treatment Centre in Ontario, traces the MDO management process from initial assessment, through secure stabilization, to preparation for release and subsequent community supervision. He outlines the difficulties of managing a population of serious offenders and highlights elements of treatment that are essential if the MDO is to be reintegrated into the community.

Placement and Treatment of Mentally Disordered Offenders May 13 2021

Violence, Crime and Mentally Disordered Offenders Aug 28 2022 The mentally disordered criminal is a public nightmare, and the management of these offenders can be driven as much by political and economic concerns as by scientific evidence and professional judgement within the fields of mental health and correction services. This book aims to provide a critical and focused review of knowledge and best practice in this field for mental health and correction professionals and for those concerned with policy and management of services for these offenders. Mentally disordered offenders include

offenders who suffer from schizophrenia, major affective disorders, personality disorders (including psychopathy), brain damage, and mental retardation. The topic is of increasing importance because of the growth of community psychiatry, and the growing community programmes for offenders, and also because of the growing pressures on those institutions which deal with offenders and care for the mentally disordered or disabled. Professionals in these fields will welcome this book which: * Provides a review of approaches to treatment, accessible to a wide mental health and forensic readership * Relates treatment approaches to specific mental problems, and reviews evidence of effectiveness * features a truly international group of authors bringing together a wide variety of approaches, scientific research, and practical experience of important programmes for treatment and prevention "Few recent texts provide both the depth and breadth necessary to understand the vexing behaviour of mentally disordered offenders. Drs Hodgins and Muller-Isberner, a remarkable pairing of research and clinical expertise, have put together a highly readable and superb resource for anyone interested in this interface of serious mental illness and criminal behavior. The authors of the constituent chapters are leading authorities in their respective areas and have provided thoughtful commentary on the most recent international literature. This is a first-rate treatment of a rapidly growing and fascinating field." Marvin Swartz, Duke University, USA

Forensic Mental Health Sep 04 2020

Mentally Disordered Offenders Sep 28 2022 In its narrowest sense, "mentally disordered offender" refers to the approximately twenty thousand persons per year in the United States who are institutionalized as not guilty by reason of insanity, incompetent to stand trial, and mentally disordered sex offenders, as well as those prisoners transferred to mental hospitals. The

real importance of mentally disordered offenders, however, may not lie in this figure. Rather, it may reside in the symbolic role that mentally disordered offenders play for the rest of the legal system. The 3,140 persons residing in state institutions on an average day in 1978 as not guilty by reason of insanity (see Chapter 4), for example, are surely worthy of concern in their own right. But they represent only 1% of the 307,276 persons residing in state and federal prisons in the same period (U. S. Dept. of Justice, 1981). From a purely numeric point of view, the insanity defense truly is "much ado about little" (Pasewark & Pasewark, 1982). The central importance of understanding these persons, however, is that they serve a symbolic function in justifying the imprisonment of the other 99%. The insanity defense, as Stone (1975) has noted, is "the exception that proves the rule. " By exculpating a relatively few people from being criminally responsible for their behavior, the law inculcates all other law violators as liable for social sanction.

Working with the Mentally Disordered Offender in the Community Nov 18 2021 This text is written for those who carry professional responsibility for the care and supervision of mentally disordered offender in the community. Topics covered include the British legal and social policy context; discrimination and prejudice; the assessment of risk; and case management.

Care Or Custody? May 25 2022 In recent years there has been growing concern and controversy surrounding the care and treatment of mentally disordered offenders. Consequently, there have been a series of legislative and policy developments during the last decade, which have led to changes in attitude and the way that such offender-patients are treated. Such changes have focused primarily upon timely therapeutic intervention and diversion from the criminal justice system. *Care or Custody?: Mentally Disordered Offenders in the Criminal*

Justice System considers these issues in depth. It is a comprehensive and scholarly text which identifies some of the practical difficulties that occur when mentally disordered offenders come into contact with the criminal justicesystem. The law in this area is complex and this book will enable professionals involved in the subject to gain a better understanding of the law and policy with regard to mentally disordered offenders. Judith Laing also analyses and addresses some of the theoretical issues and concerns surrounding the treatment and detention of mentally disordered offenders. The book will therefore assist and inform legal, mental health, and related practitioners working in this field, and will also provide atheoretical overview of the law for academics and students.

Review of Health and Social Services for Mentally Disordered Offenders and Others Requiring Similar Services Aug 04 2020

Mentally Ill Offenders in California's Criminal Justice System Jul 03 2020 Prepared at the request of Assembly member Helen Thomson, Chair, Assembly Select Committee on Mental Health.

The Mentally Disordered Offender Dec 28 2019 This assessment outlines the negative aspects of current procedures for dealing with mentally disordered criminals, and suggests feasible solutions to many problems. Topics covered include the criminal process, the courts, prison, hospital and community management.

Mental Health, Crime and Criminal Justice Oct 25 2019 It has long been known that the pathway through the criminal justice system for those with mental health needs is fraught with difficulty. This interdisciplinary collection explores key issues in mental health, crime and criminal justice, including: offenders' rights; intervention designs; desistance; health-informed approaches to offending and the medical needs of offenders; psychological jurisprudence, and;

collaborative and multi-agency practice. This volume draws on the knowledge of professionals and academics working in this field internationally, as well as the experience of service users. It offers a solution-focused response to these issues, and promotes both equality and quality of experience for service users. It will be essential reading for practitioners, scholars and students with an interest in forensic mental health and criminal justice.

The Mentally Disordered Offender in an Era of Community Care Feb 19 2022 Essential reading for all professionals working in the psychiatric and criminal justice systems with mentally disordered offenders.

Protecting the Public? Oct 30 2022 The separation of powers and independent, judicial decision-making are generally accepted as hallmarks of the rule of law in democratic societies. Yet the exercise of executive discretion remains an important aspect of criminal justice in many areas. *Protecting the Public?* explores the tension between the rights of individuals detained under criminal and mental health law and the responsibility for public protection in the little-known world of executive discretion over mentally disordered offenders. It is based on extensive and unique empirical research conducted at the UK Home Office, with legal and clinical practitioners, with civil society organisations and by reference to comparative jurisdictions. Central questions considered include: executive, judicial and tribunal decision-making; mental health and criminal law reform regarding serious or high-risk offenders; the influence of human rights law on policy and practice; and the role of civil society, particularly victim interest groups, in public policy. Through its analysis of decisions to release 'high-risk' offenders, this book goes to the heart of the public protection agenda - examining how 'the public' is constructed and what protection is provided by the exercise of executive

discretion. This book will be of interest to academic and other researchers, students, policy-makers, law reformers, commentators and anyone interested in the field of criminal justice, mental health law and public policy.

Clinical Approaches to the Mentally Disordered Offender Dec 20 2021 The papers in this book discuss the legal issues and research evidence which support treatment of mentally disordered offenders. It focuses particularly on three areas of mental disorder -- mental illness, mental impairment, and psychopathy -- and illustrates the particular problems faced by clinicians and researchers in working with these types of offenders.

A Sociology of the Mentally Disordered Offender Mar 23 2022 In recent years mentally disordered offenders have attracted considerable attention in the media and there has been heated public debate as to the best treatment and prevention of re-offending. Simultaneously there has been a significant increase in the amount of research, specialist courses and training devoted to this particular, high profile area of mental health care. This is as a result of considerable public pressure to develop effective theory and practice for diagnosing and treating this patient group. *A Sociology of the Mentally Disordered Offender* provides a concise, and most importantly, accessible guide to the main theoretical issues from a sociological perspective as a counterbalance to the predominant medical model. Having established a theoretical framework through the exploration of topics such as the relationship between crime and mental disorder the authors look at the processes by which offenders are referred either to criminal justice or the mental health service system, their subsequent treatment and management, and the problem of re-offending. A final chapter looks at ways in which care and management of these patients may be effectively developed in the future.

Directory of Institutions for Mentally Disordered Offenders Jan 21 2022

Forensic Nursing and Multidisciplinary Care of the Mentally Disordered Offender Dec 08 2020 The first comprehensive account of forensic nursing and its role within the wider professional team, the aim of this book is to provide a multidisciplinary perspective on the training needed to work with mentally disordered patients, as well as to examine the key characteristics of the forensic nursing role. An international group of contributors, from a wide range of disciplines, provides a well-rounded, comparative view of the forensic nursing profession. The chapters are a rich contribution of cross-cultural thinking on the many dilemmas and challenges facing nurses, psychiatrists, psychologists and other health care practitioners, working with specific client groups. Each contributor has utilised empirical data to analyse relevant issues, such as: professional standards; effectiveness of preparation for nurses working within secure environments; day to day and long term challenges facing nurses; clinical effectiveness; the dilemma of security versus practice; how forensic nursing differs from other kinds of nursing; and what forensic nurses can contribute to other mental health care disciplines. Examples of how research findings may be integrated into practice, will be of interest not only to forensic nurses, but also to significant sectors of the mental health care field.

Review of Health and Social Services for Mentally Disordered Offenders and Others Requiring Similar Services: Service needs : the reports of the Community, Hospital and Prison Advisory Groups and an overview by the Steering Committee Feb 07 2021

Forensic Mental Health Oct 06 2020 This analysis of the forensic mental health system - how it operates, the people involved, the problems inherent in the system, and the huge ethical dilemmas - brings together a range of specialists, who describe the processes involved in dealing with a mentally disordered offender.

Long-Term Forensic Psychiatric Care Sep 24 2019 This book provides an overview of forensic psychiatry, focusing on the provision of care in Europe as well as the legal and ethical challenges posed by long-term stays in forensic settings. Forensic psychiatric services provide care and treatment for mentally disordered offenders (MDOs) in secure in-patient facilities as well as in the community. These services are high-cost/low-volume services; they pose significant restrictions on patients and hence raise considerable ethical challenges. There is no agreed-upon standard for length of stay (LoS) in secure settings and patients' detainment periods vary considerably across countries and even within the same jurisdiction. Thus far, little research has been conducted to identify factors associated with length of stay; consequently, it remains unclear how services should be configured to meet the needs of this patient group. This volume fills some of those gaps. Furthermore, it presents new research on factors associated with length of stay, both patient-related and organisational. Various approaches to the provision of care for long-term patients in different countries are explored, including a few best practise examples in this specific area of psychiatry. The book also addresses the perspective of those working in

forensic care by reviewing quality-of-life research and interviews with patients. The authors of this volume come from a range of professional backgrounds, ensuring a certain breadth and depth in the topic discussion, and even includes patients themselves as (co-)authors.

Care of the Mentally Disordered Offender in the Community Nov 30 2022 The thoroughly revised second edition of *Care of the Mentally Disordered Offender in the Community* is a comprehensive, evidence-based guide to the latest developments in the social context, management, and treatment of offenders in mental health care. In recent years there has been significant changes in the public perception of crime and the mentally ill offender, enhanced by research into causal links between violence and mental illness, and the increased publicity of the risk mentally disordered offenders could pose to the community. These, and other various factors, have significantly increased service development and research into psychological and pharmacological treatments and the rate of re-offending. Over three sections this essential guide explores key topics for discussion in the field. Part One critically examines the social, administrative and clinical context within which care is given in the modern day. Part Two discusses treatment and the evaluation of risk when determining the most appropriate treatment, whilst Part Three explores psychiatric services and their relationship with other agencies. Fully updated to ensure new areas for discussion are included, this book includes new chapters on relevant debates in the field such as US provision for the mentally disordered leaving prison, community management of sexual offending, the relationships between care and coercion, and the treatment of personality disorders. Written and edited by a global team of experts in the field, this book provides readers with useful insight into the social, clinical, and institutional contexts of this complex and relevant

issue.

Providing Services for Jail Inmates with Mental Disorders Aug 23 2019

Mental Health and Criminal Justice Nov 26 2019 This is the first book to examine the relationship between the American mental health and criminal justice systems from a social science perspective. The contributors -- esteemed scholars from the fields of criminology, law and psychiatry -- illuminate critical areas of the mental health/criminal justice process: how laws and statutes govern the treatment of mentally disordered offenders, how a change in one procedure affects the entire intersystem process, how police manage the deinstitutionalized mentally ill, and how deviant behaviour is defined and treated.
