This is the first English-language book on the philosophy of Ji Kang. Moreover, it offers the first systematic treatment of his philosophy, thus filling a significant gap in English-language scholarship on early medieval Chinese literature and philosophy. David Chai brings to light Ji Kang's Neo-Daoist heritage and explores the themes in his writings that were derived from classical Daoism, most notably the need for humanity to return to a more harmonious co-existence with Nature to further our own self-understanding. His analysis is unique in that it balances translation and annotation with expounding the creative philosophizing of Neo-Daoism. Chai analyzes the entirety of Ji Kang's essays, exploring his philosophical reflections on music, aesthetics, ethics, self-cultivation, and fate. Reading Ji Kang's Essays will be of interest to scholars and students of Chinese philosophy and literature. It offers the first comprehensive philosophical examination of a heretofore neglected figure in Neo-Daoism. This edited volume presents a comprehensive examination of contemporary Confucian philosophy from its roots in the late 19th century to the present day. It provides a thorough introduction to the major philosophers and topics in contemporary Confucian philosophy. The individual chapters study the central figures in 20th century Confucian philosophy in China, Taiwan, and Hong Kong, as well as the important influences on recent Confucian philosophy. In addition, topical chapters focus on contemporary Confucian theory of knowledge, ethics, politics, aesthetics, and views of human nature. The volume brings together scholars from around the world to provide a sound overview of the philosophy of the period and illustrate the important current debates. Confucian philosophy has been undergoing a revival in China for more than three decades, and this book presents the most significant work of the past century and more. Close] Essential reading for serious students of Chinese practical arts, including medicine, martial arts and FengShui, Master Zhongxian Wu and Dr Karin Taylor Wu provide a detailed explanation of the 22 GanZhi symbols in this book, outlining the characteristics of each, and their interactions and relationships. TianGan (Heavenly Stems) and DiZhi (Earthly Branches), commonly abbreviated to GanZhi, originated in the ancient Chinese cosmological sciences and is a complex calendrical system which was created to codify the patterns of life and of the universe itself. The ten symbols of Gan express the Yin or Yang perspective of Five Elements and embody the Way of Heaven. The 12 symbols of Zhi, made manifest in the 12 animals of the Chinese zodiac, hold the root of each Element and embrace the Way of Earth. Poetic summaries from the Song dynasty give the reader a deep understanding of the nature of each Stem and their relationship to each other. Offering an unprecedented insight into the subtleties and far-reaching influence of this ancient system, this book will be invaluable for the study or practice of Chinese medicine, FengShui, Chinese astrology, traditional Chinese cosmology, Qigong, Taiji, and other inner cultivation practices. A set of study cards (9781848191501), also published by Singing Dragon, are available to accompany this book. Critically introduces the philosophical system of Li Zehou, one of the most significant modern scholars of Chinese history and culture. In this book, Jana S. Rošker offers the first comprehensive overview and exegesis of the work of Li Zehou, who is one of the most significant and influential Chinese philosophers of our time. Rošker shows us how Li's complex system of thought seeks to revive various Chinese traditions, and at the same time attempts to harmonize or reconcile this cultural heritage with the demands of the dominant economic, political, and axiological structures of our globalized world. Various characterized as "neo-traditional," "neo-Kantian," "post-Marxist," "Marxist-Confucian," "pragmatist," "instrumentalist," "romantic," and more, Li's work was central to the period known as the Chinese Enlightenment in the 1980s and has helped modify and transform antiquated patterns of Chinese intellectual discourse. He is one of the rare Chinese thinkers whose work has not only had a deep and lasting impact on Chinese intellectuals, but has acquired a broad readership outside of China as well. Seen from a broader intercultural perspective, Li's unique and imaginative approach to a wide range of basic theoretical problems has created new styles of intellectual investigation, while reminding us of our belonging to a common humanity, regardless of differences in our individual cultures, languages, preferences, and traditions. Jana S. Rošker is Professor of Sinology at the Department of Asian Studies, Faculty of Arts, University of Ljubljana, Slovenia and the author of *The Rebirth of the Moral Self: The Second Generation of Modern Confucians and their Modernization Discourses*. This engaging, highly anticipated book compellingly describes healing techniques of Chinese shamanism while respecting the tradition. CT Holman, a medically trained and licensed clinician of over 20 years, clearly explains how Chinese shamanism can be seamlessly woven into modern lifestyle and contemporary medical practices. He explores effective methods to address physical pathologies and emotional imbalances by applying shamanic-influenced techniques including visualizations, verbal healing and shamanic drumming, among others for self-care and medical treatment. The primary resource for the material presented originates from the author's intensive decade-long study under shamanic teacher, Master Zhongxian Wu. Several color illustrations and before-and-after patient photos are included that beautifully depict the spirit-based diagnostics and treatments. Incorporating numerous clinical examples and thoroughly researched procedures, this book teaches practitioners how to combine treatments - concentrating on the spirit and soul - with modern medicine to treat the whole person and enrich their practice. This enlightening book is a must-read for Chinese medicine practitioners, other medical professionals and non-professionals interested in the subject. Intessuto di precisi riferimenti alchemici e filosofici, lo Studio della Boxe Bagua di Sun Lutang è uno dei testi più affascinanti e il primo a essere stato scritto su questa originale e complessa arte marziale. Composto da un grande combattente della vecchia generazione, che incarnava l'ideale del letterato-guerriero dotato di un'eccellente cultura e che fu portato a modello dei giovani per rilanciare lo spirito nazionalistico in un difficile momento storico della Cina del primo Novecento, il libro ha dato un grande impulso alla ripresa della pubblicazione di manuali sulle arti marziali e ha creato le basi per la cultura di queste discipline, così come le intendiamo oggi in Occidente. Il suo messaggio è profondo nel modo, quanto semplice nella prassi: la maestria si racchiude in una pratica costante e in uno spirito aperto alla crescita. Beautiful aunt has lived in my home, since then my waist has never relaxed... This book presents an East-West dialogue of leading translation scholars responding to and developing Martha Cheung's "pushing-hands" method of translation studies. Pushing-hands was an idea Martha began exploring in the last four years of her life, and only had time to publish at article length in 2012. The concept of pushing-hands suggests a promising line of inquiry into the problem of conflict in translation. Pushing-hands opens a new vista for translation scholars to understand and explain how to develop an awareness of non-confrontational, alternative ways to handle translation problems or problems related to translation activities that are likely to give rise to tension and conflict. The book is a timely contribution to celebrate Martha's work and also to move the conversation forward. Despite being somewhat tentative and experimental, it probes into how to enable and develop dynamic interaction between and reciprocal determinism of different hands involved in the process of translation. The book provides a comprehensive and in-depth analysis of Wang's philosophy at different stages throughout its maturation so as to sketch the essential character and grand picture of Wang's philosophy. As a systematic study of Wang's philosophy, this monograph boasts a broad perspective, profound analysis and substantial historical data. It is a perfect manifestation of the author's academic accomplishment and presents the readers with a panorama of Wang's thought. Although the book is focused primarily on Wang, its scope and methodology carry great implications for the study of Song and Ming Confucianism and even ancient Chinese philosophy as a whole. "Wang Hui, the most celebrated painter of late-seventeenth-century China, played a key role both in reinvigorating past traditions of landscape painting and in establishing the stylistic foundations for the imperially sponsored art of the Qing court. Drawing upon his protean talent and immense ambition, Wang developed an all-embracing synthesis of historical landscape styles that constituted one of the greatest artistic innovations of late imperial China." "This comprehensive study of the painter, the first published in English, features three essays that together consider his life and career, his artistic achievements, and his masterwork - the series of twelve monumental scrolls depicting the Kangxi emperor's Southern Inspection Tour of 1689. The first essay, by Wen C. Fong, closely examines Wang Hui's genius for "repossessing the past," his ability to engage in an inventive dialogue with previous masters and to absorb their stylistic personae while making works that were distinctly his own. Chin-Sung Chang next traces the entire trajectory of Wang's development as an artist, from his precocious youth in the village of Yushan, through growing local and national fame - first as a copyist, then as the creator of groundbreaking panoramic landscapes - to the ultimate confirmation of his stature with the commission to direct the Southern Inspection Tour project. Focusing on this extraordinary eight-year-long effort, Maxwell K. Hearn's essay discusses the contemporary sources for the scrolls, the working methods of Wang and his assistants (comparing drafts with finished versions), and the artistic innovations reflected in these imposing works, the extant examples of which measure more than two feet high and from forty-six to eighty-six feet long." "This publication accompanies the exhibition "Landscapes Clear and Radiant: The Art of Wang Hui (1632-1717)," held at The Metropolitan Museum of Art, New York, from September 9, 2008, through January 4, 2009."--BOOK JACKET. "Well-being" is a contemporary term used by people around the globe to address how comfortable their lives are. The notion is considered significant to business management. Nevertheless, is well-being significant to Chinese family business? In response to this inquiry, this book demystifies the notion from a critical lens. It examines well-being in a Chinese family business context of Hong Kong. This book consists of an archaeological and anthropological examination. The first part of the analysis draws from Foucault's (1979) Archaeology of Knowledge to examine the discursive (trans)formation of well-being. The second part is an ethnography that focuses on a Chinese perspective regarding the everydayness of life. In light of the recent social movements, this book not only offers an insight into the core values of Hong Kongers, but also dissects various layers of meaning in these values. Hopefully, this book can lift up the voices of Hong Kongers, who was once marginalised in the discourse of well-being. The era of the fall of an immortal god, the gloomy life of the Divine Emperor. Zhu Xi (1130-1200) has been commonly and justifiably recognized as the most influential philosopher of Neo-Confucianism, a revival of classical Confucianism in face of the challenges coming from Daoism and, more importantly, Buddhism. His place in the Confucian tradition is often and also very plausibly compared to that of Thomas Aquinas, slightly later, in the Christian tradition. This book presents the most comprehensive and updated study of this great philosopher. It situates Zhu Xi's philosophy in the historical context of not only Confucian philosophy but also Chinese philosophy as a whole. Topics covered within Zhu Xi's thought are metaphysics, epistemology, ethics, political philosophy, hermeneutics, philosophy of religion, moral psychology, and moral education. This text shows both how Zhu Xi responded to earlier thinkers and how his thoughts resonate in contemporary philosophy, particularly in the analytic tradition. This companion will appeal to students, researchers and educators in the field. "Constant Words Awakening the World (????
