James believed that philosophy was meant to  
articulate, and help answer, a single existential  
question, one which lent itself to the title of one  
of his most famous essays: "Is life worth living?"  
Through examination of an array of existentially  
loaded topics covered in his works-truth, God,  
evil, suffering, death, and the meaning of life-  
James concluded that it is up to us to make life  
worth living. He said that our beliefs, the truths  
that guide our lives, matter-their value and  
veracity turn on the way they play out practically  
for ourselves and our communities. For James,  
philosophy was about making life meaningful,  
and for some of us, liveable. This is the core of  
his "pragmatic maxim," that truth should be  
judged on the bases of its practical  
consequences. Kaag shows how James put this  
maxim into use in his philosophy and his life and  
how we can do so in our own. . William James  
(1842-1910) was one of the most original and  
influential American thinkers of the late 19th  
and early 20th centuries. As a professor at  
Harvard University he published many works  
that had a wide-ranging impact on both  
psychology and philosophy. His Principles of  
Psychology was the most important English-  
language work on the mind since Locke's Essay  
Concerning Human Understanding. His Varieties  
of Religious Experience practically inaugurated  
the field of psychology of religion, and it also

remains a major inspiration for philosophy of religion. Perhaps most importantly, James publicized the movement of pragmatism and supplied much of its powerful momentum. This book covers the primary topics for which James is still closely studied: the nature of experience; the functions of the mind; the criteria for knowledge; the definition of "truth"; the ethical life; and the religious life. His notable terms, still resonating in their respective fields, are all here, from the "stream of consciousness" and "pure experience" to the "will to believe," the "cash-value of truth," and the distinction between the religiously "healthy soul" and the "sick soul." This volume's eighteen selections receive the bulk of the attention and citation from scholars, provide excellent coverage of core topics, and have a broad appeal across many academic disciplines. This well-organized compilation of James's important writings offers an exciting and fascinating tour for both the casual reader and the dedicated student interested in philosophy, psychology, religious studies, American studies, or any related field. In the second century AD, a Greek nobleman is travelling and living abroad in Germany while carrying on an affair with a military man's wife. When discovered, he takes an emergency business trip to save his life and packs amongst his belongings certain items that lead the people he encounters to think him a Norse God, a fortuitous point of view which he does little to dispel. Forced to keep up the pretence of being a god while staying one step ahead of his lover's jealous husband, Photinus must juggle the severity of his situation with the enjoyment of being a God. "John Phillips writes with enthusiasm and clarity, . . . cutting through the confusion and heretical dangers associated with Bible interpretation." —Moody Magazine "A poet of our precarious moment . . . James's searing attention is upon the fleeting, the untethered, upon fecundity and decay, the cosmic and the molecular." --CAROLYN FORCHÉ A collection of 180 county court petitions designed to offer as broad a selection as possible and include the voices of all participants: black and white, slave and free, slaveholder and non-slaveholder, male and female. James' analysis of Chartres is likely to be the best and most detailed we shall have.' JOURNAL OF ARCHITECTURAL HISTORIANS The great cathedral of Chartres is the most impressive and exciting building surviving from the middle ages, and is preserved almost intact. Yet we know nothing of the men who created it. John James, in this masterpiece of detection, shows how he came to identify the master masons from the stones themselves. His meticulous 'reading' of

the cathedral has revealed much about those men: how they solved problems of engineering and design, how they raised two-ton stones forty metres into the air, and how one mason controlled over 300 men in this gigantic workshop. JOHN JAMES is an Australian architect. His first visit to Chartres, in 1969, led to a continuing passion for the early Gothic buildings of northern France, and he has been 'reading their stones' ever since. Beginning in 1924, Proceedings are incorporated into the Apr. number. This concise yet scholarly study elucidates four of the non-Pauline movements in the early church, each of which can be identified with a particular leader: Peter, Stephen, James, and John. Bruce skillfully interprets the limited source materials found in Paul's letters, the Acts of the Apostles, the Gospels, and other early Christian writings to provide an informative and illuminating work. How a young man with a solid work ethic carried himself out of poverty to the pinnacle of professional sports and business. Before he turned sixteen, Edgerrin James had already developed the critical thinking and

mental discipline required for him to become one of the most astute business minds in professional sports. Acclaimed as one of the greatest running backs of his generation who was inducted into the 2020 Pro Football Hall of Fame, James is a self-made financial whiz and philanthropist. Selected by the Indianapolis Colts with the fourth overall pick in the 1999 NFL Draft and signing the largest contract for a rookie running back in league history, James amassed over 12,000 rushing yards, was a four-time NFL All-Pro, and led the league in rushing in each of his first two seasons. In his new memoir, From Gold Teeth to Gold Jacket, with award-winning sports journalist John Harris and a foreword from fellow teammate and Hall of Famer Peyton Manning, James shares his unique, no-holds-barred perspective in becoming an all-time NFL great while also building a financial empire while raising six children. The product of a single-parent household in one of the most downtrodden rural areas in the state of Florida, James balanced life as a young father as he became one of the best players in college football at the University of Miami. Later, facing what seemed like an insurmountable obstacle after reaching the pros, he overcame a devastating knee injury to leave an indelible mark on the sport. When his football career ended prematurely following the tragic death of the mother of his children, James made a seamless transition to become a successful businessman. This tell-all book, featuring colorful anecdotes from his football career and personal life delivered in conversational prose, draws parallels between sports and business and guides readers on how to develop their own personal game plan to reach their maximum potential. A comprehensive collection of writings by the legendary philosopher, whose sweeping body of work influenced our ideas about psychology, religion, free will, and pragmatism. The critical periods of James's life are highlighted to illuminate the development of his philosophical and psychological thought. The anthology features representative selections

from The Principles of Psychology, The Will to Believe, and The Variety of Religious Experience in addition to the complete Essays in Radical Empiricism and A Pluralistic Universe. The original 1907 edition of Pragmatism is included, as well as classic selections from all of James's other major works.
