"This is quite simply the best study of judicial independence that I have ever read; it is erudite, historically aware, and politically astute." ---Malcolm M. Feeley, Claire Sanders Clements Dean's Professor, Boalt Hall School of Law, University of California at Berkeley "Professor Geyh has written a wise and timely book that is informed by the author's broad and deep experience working with the judicial and legislative branches, by the insights of law, history and political science, and by an appreciation of theory and common sense." ---Stephen B. Burbank, David Berger Professor for the Administration of Justice, University of Pennsylvania Law School With Congress threatening to "go nuclear" over judicial appointments, and lawmakers accusing judges of being "arrogant, out of control, and unaccountable," many pundits see a dim future for the autonomy of America's courts. But do we really understand the balance between judicial independence and Congress's desire to limit judicial reach? Charles Geyh's *When Courts and Congress Collide* is the most sweeping study of this question to date, and an unprecedented analysis of the relationship between Congress and our federal courts. Efforts to check the power of the courts have come and gone throughout American history, from the Jeffersonian Congress's struggle to undo the work of the Federalists, to FDR's campaign to pack the Supreme Court, to the epic Senate battles over the Bork and Thomas nominations. If legislators were solely concerned with curbing the courts, Geyh suggests, they would use direct means, such as impeaching uncooperative judges, gerrymandering their jurisdictions, stripping the bench's oversight powers, or slashing judicial budgets. Yet, while Congress has long been willing to influence judicial decision-making indirectly by blocking the appointments of ideologically unacceptable nominees, it has, with only rare exceptions, resisted employing more direct methods of control. When Courts and Congress Collide is the first work to demonstrate that this balance is governed by a "dynamic equilibrium": a constant give-and-take between Congress's desire to control the judiciary and its respect for historical norms of judicial independence. It is this dynamic equilibrium, Geyh says, rather than what the Supreme Court or the Constitution says about the separation of powers, that defines the limits of the judiciary's independence. When Courts and Congress Collide is a groundbreaking work, requiring all of us to consider whether we are on the verge of radically disrupting our historic balance of governance. Charles Gardner Geyh is Professor of Law and Charles L. Whistler Faculty Fellow at Indiana University at Bloomington. He has served as director of the American Judicature Society's Center for Judicial Independence, reporter to the American Bar Association Commission on Separation of Powers and Judicial Independence, and counsel to the Judiciary Committee of the U.S. House of Representatives. At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines. Includes: troubleshooting tips for monochrome laser printers from Hewlett-Packard, Apple, IBM/Lexmark and Panasonic; diagrams and visual defect drawings to better aid in troubleshooting specific problems; error codes and their meanings; part lists with manufacturers' part numbers; replacement parts sources. When Teddy Anderson's little sister Tina is gunned down randomly in a drive-by shooting, the gangstas who rule the streets in the Anderson family's rapidly deteriorating neighborhood dismiss the incident as just another case of RP, RT???wrong place, wrong time. According to gangsta logic, Tina doesn't even count as a statistic. Teddy's family is devastated. Mrs. Anderson sinks into deep depression while Pops struggles to run both the household and his declining laundry business. The Andersons are shocked still further when Teddy is arrested and thrown in prison for attempted homicide after his elaborately laid plans for revenge against his sister's killer are foiled by the cops. Teddy soon finds himself out of prison on house arrest, and in the capable hands of Officer Mariana Diaz, the smart, tough probation officer assigned to oversee his endless hours of community service. As part of the innovative rehabilitation program Diaz runs, Teddy is assigned to tutor Micah, a twelve-year-old orphan and would-be gansta. As Teddy goes through the motions of complying with the terms of his probation, Diaz has no idea that he is using his genius-level computer hacker skills to plot his final vengeance and to defraud the state education system of hundreds of thousands of dollars. But even though Teddy thinks he knows it all, he fails to see how Micah's desperate need for love and trust just might have the power not only to pierce all Teddy's defenses, but to save his family. The debate on the role of the police in Britain, heated by the 1984 miners' dispute and the 1985 Handsworth and Brixton riots, gained urgency with the implementation of the Police and Criminal Evidence Act in 1986. This important volume provides an informed and accessible discussion of the changes made by the Act, and their implications. Individuals from a wide variety of viewpoints - including critics of aspects of policing, campaigners for law reform, academics, chief police officers and representatives of other police ranks - aim to inform, analyze, raise questions and offer some answers to current policing dilemmas. A look at Fayetteville, North Carolina, home to Fort Bragg, that poses the question,'Are we all military dependents?' Fayetteville has earned the nicknames of Fatalville and Fayetteenam. Unusual and not-sounusual features of the town include gross income inequalities, an extraordinarily high incidence of venereal disease, miles and miles of strip malls, and a history of racial violence. Through interviews with residents and historical research, Catherine Lutz immerses herself in the life of the town to discover how it has supported the military for over a century. From secret training operations that use civilians as mock enemies and allies to the satellite economy of the town, Lutz's history of Fayetteville reveals the burdens that military preparedness creates for all of us. Provides an indepth analysis of the American legal system and proposes reforms in the workings of the court. What happens when public prosecutors, the most powerful officials in the criminal justice system, seek convictions instead of justice? Why are cases involving well-to-do victims often prosecuted more vigorously than those involving poor victims? Why do wealthy defendants frequently enjoy more lenient plea bargains than the disadvantaged? In this eye-opening work, Angela J. Davis shines a much-needed light on the power of American prosecutors, revealing how the day-to-day practice of even the most well-intentioned prosecutors can result in unequal treatment of defendants and victims. Ranging from mandatory minimum sentencing laws that enhance prosecutorial control over the outcome of cases, to the increasing politicization of the office, Davis uses powerful stories of individuals caught in the system to demonstrate how the perfectly legal exercise of prosecutorial discretion can result in gross inequities in criminal justice. For the paperback edition, Davis provides a new Afterword which covers such recent incidents of prosecutorial abuse as the Jena Six case, the Duke lacrosse case, the Department of Justice firings, and more. Succinct and concise, this textbook covers all the procedural and substantive aspects of EU competition law. It explores primary and secondary law through the prism of ECJ case law. Abuse of a dominant position and merger control are discussed and a separate chapter on cartels ensures the student receives the broadest possible perspective on the subject. In addition, the book's consistent structure aids understanding: section summaries underline key principles, questions reinforce learning and essay discussion topics encourage further exploration. By setting out the economic principles which underpin the subject, the author allows the student to engage with the complexity of competition law with confidence. Integrated examples and an uncluttered writing style make this required reading for all students of the subject. *Trees Up Close* offers an intimate, revealing look at the beauty of leaves, flowers, cones, fruits, seeds, buds, bark, and twigs of the most common trees. "As frustration mounts in some quarters at the perceived inadequacy or speed of international action on climate change, and as the likelihood of significant impacts grows, the focus is increasingly turning to liability for climate change damage. Actual or potential climate change liability implicates a growing range of actors, including governments, industry, businesses, non-governmental organisations, individuals and legal practitioners. *Climate Change Liability* provides an objective, rigorous and accessible overview of the existing law and the direction it might take in seventeen developed and developing countries and the European Union. In some jurisdictions, the applicable law is less developed and less the subject of current debate. In others, actions for various kinds of climate change liability have already been brought, including high profile cases such as *Massachusetts v. EPA* in the United States. Each chapter explores the potential for and barriers to climate change liability in private and public law"-- An alien intelligence initiates first contact with the Earth, but it may be the last thing we ever hear.As Cal-Tech astrophysicist Allan Sands prepares to spend another perfect Pasadena Christmas with his wife and children, he realizes something isn't right. The television doesn't work, mobile networks are down, and the internet slows to a halt. When Allan notices celestial objects are absent from the early-morning sky he knows this is no power outage or terrorist attack. He heads to nearby Mt. Wilson Observatory, where he discovers the cause of the strange Event is worse than he could have imagined. From his perch above Los Angeles Allan can see the oncoming tsunami that will devastate the coastline and kill millions, foreshadowing disasters soon to befall the entire planet. And he may be the only person who knows why.2,500 miles away at Hickam Air Force Base in Honolulu Lieutenant Lee Green and her raptor squad are the only pilots left to escort the president to safety as the world scrambles to save lives and comprehend what is happening. Their next mission: Find Allan Sands and the other scientists on the president's secret First Contact list.Will the world be ready to hear what the scientists conclude about the mysterious so-called Event that turned day to night? When a strange object is spotted heading for the Earth the world wonders if the aliens are coming in peace to help us survive or to finish what they started.Equal parts high concept and high action, the *Filter Trap* explains Fermi's Paradox in a way that contrasts the hidden terrors of the universe with the ever-present hope in the human heart. *Trope London*, the second volume in the *Trope City* Editions series highlighting the world's most architecturally compelling cities, is a highly curated collection of photographic images from an active community of urban photographers who have passionately captured their city like never before. History that doesn't suck: Smart, crude, and hilariously relevant to modern life. Those who don't know history are doomed to repeat it. Too bad it's usually boring as sh*t. Enter The Captain, the ultimate storyteller who brings history to life (and to your life) in this hilarious, intelligent, brutally honest, and crude compendium to events that happened before any of us were born. The entries in this compulsively readable book bridge past and present with topics like getting ghosted, handling haters, and why dog owners rule (sorry, cat people). Along the way you'll get a glimpse of Edith Wharton's sex life, dating rituals in Ancient Greece, catfishing in 500 BC, medieval flirting techniques, and squad goals from Catherine the Great. You'll learn why losing yourself in a relationship will make you crazy--like Joanna of Castile, who went from accomplished badass to Joanna the Mad after obsessing over a guy known as Philip the Handsome. You'll discover how Resting Bitch Face has been embraced throughout history (so wear it proudly). And you'll see why it's never a good idea to f*ck with powerful women--from pirate queens to diehard suffragettes to Cleo-f*cking-patra. People in the past were just like us--so learn from life's losers and emulate the badasses. The Captain shows you how. Morality is one of the fundamental structures of any society, enabling complex groups to form, negotiate their internal differences and persist through time. In the first book-length study of Roman popular morality, Dr Morgan argues that we can recover much of the moral thinking of people across the Empire. Her study draws on proverbs, fables, exemplary stories and gnomic quotations, to explore how morality worked as a system for Roman society as a whole and in individual lives. She examines the range of ideas and practices and their relative importance, as well as questions of authority and the relationship with high philosophy and the ethical vocabulary of documents and inscriptions. The Roman Empire incorporated numerous overlapping groups, whose ideas varied according to social status, geography, gender and many other factors. Nevertheless it could and did hold together as an ethical community, which was a significant factor in its socio-political success. Some things weren't meant to stay hidden... Sydney Davies is used to being in the spotlight. But the former model turned fashion designer isn't used to family secrets. Sydney is sent to dig up the past. What she finds instead is Deacon and a case of a missing girl with a link back to her life in the fashion industry. Deacon McKnight is hardly ever surprised due to his work as an investigator. But then he finds a woman with a shovel in his backyard in the middle of the night. And that is just the start of surprises. Now Sydney's life is in danger because of his case and Deacon must decide if some things are better left hidden. For two centuries, federal judges exercised wide discretion in criminal sentencing. In 1987 a complex bureaucratic apparatus termed Sentencing "Guidelines" was imposed on federal courts. FEAR OF JUDGING is the first full-scale history, analysis, and critique of the new sentencing regime, arguing that it sacrifices comprehensibility and common sense. Peire Vidal, one of the most celebrated of the Occitan troubadours, was a favorite performer at the courts of France, Spain, Italy, Malta, and Palestine during the late twelfth and early thirteenth centuries. His witty and humorous love-songs and satires provide a fascinating insight into the courtly society of his times. This book includes the first English translation and commentary of the complete works of Peire Vidal. It is a useful and accessible text for students and specialists of medieval literature. How you can fix the most common problems with the most common dryers, including: Whirlpool/Kenmore, GE/Hotpoint/JC Penney, Maytag, Frigidaire, Norge, Gibson, Kelvinator, Westinghouse, Montgomery Ward/Signature, Speed Queen/Amana, and many more. 'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.
