Your inner light is your soul and it is guiding you every moment of every day. *Light Is the New Black* is a guidebook for those who agreed to be here at this time in history to answer the call of their soul and work their light. This soulful, encouraging book will guide you to hear the callings of your soul, so you can light up the world with your presence. Rebecca Campbell had her first awakening when she was a teenager, but without anyone to guide her, she ignored her soul's callings and dimmed her light in order to fit in. Then, just before her 30th birthday, the life she had so consciously created began to crumble around her. It was as if the Universe had turned off all the lights, so she had no choice but to rediscover her own. In this book, Rebecca shares her own journey, alongside practical

tools to help you reconnect with the core of your being and channelled messages from the Universe. Once you rediscover what you already know at soul level, you can create a life that is in alignment, discover your soul gifts and offer the world something that only you can give. There are only two other guests: Dana Steele, a librarian, and Zoe McCourt, a single mother. On the surface, it seems the women have nothing in common, until their mysterious hosts tell them a story—and

offer them a challenge. Legend has it that the souls of three demigoddesses—one an artist, one a bard, and one a warrior—have been locked in a box that has three keys. Now it's up to Malory and the others to find the keys. Their reward: a million dollars each. It all seems too bizarre to be true. But none of them can ignore the financial windfall they stand to gain. And now Malory—with her soul of an artist and eye for beauty—must find her key first. She soon discovers that whatever locked the souls away is dark, powerful, and greedy...and it doesn't want the women to win. - Why don't snorers wake themselves with the racket they make?
- Do insects sleep?

These are just a few of the intriguing questions asked and answered in *The Quirks & Quarks Question Book*, the first question and answer book to come out of CBC Radio's enormously popular weekly science program. *Quirks & Quarks* producers have combed through ten years' worth of archives to find the most

puzzling questions - or the most fascinating answers to apparently simple questions - from the program's Question of the Week segment or its once-a-season all-question show. The scientists and researchers with the answers (many of whom updated their answers for the book in light of new research findings) come from all scientific disciplines and all parts of the country. What they have in common is their ability to explain serious, complicated science in layman's terms. This isn't science made simple, but science made understandable. Introduced by the program's host for the past ten years, the genial and ever-curious Bob McDonald, *The Quirks & Quarks Question Book* has the answers to questions you may never have thought to ask (why does Uranus spin on a different axis from all the other planets in our solar system?) or have spent idle time wondering about (why is there a calm before a storm?). Whether you want to know if you can sweat while you swim or what the view would be like if you could

travel at the speed of light, or perhaps you just want to peruse the latest scientific thinking on a wide range of topics, *The Quirks & Quarks Question Book* has the answer. *Quirks & Quarks* has been keeping Canadians up to date on the world of science for more than 25 years. Every week, the program presents the people behind the latest discoveries in the physical and natural sciences. The program also examines the political, social, environmental, and ethical implications of new developments in science and technology. Over its lifetime, *Quirks & Quarks* has won more than 40 national and international awards for science journalism.
