detailed commentary on the Confessions of Augustine in
three volumes. A revised Latin text of the Confessions
appears in Volume I and forms the basis for a detailed line-
by-line commentary (Volumes II-III) designed to elucidate
the many layers of meaning in the work. Eschewing
conventional Roman notions of manliness, Cicero constructs
a distinctly aestheticized identity that flirts with the
questionable domains of the theatre and the feminine, and
thus fashions himself as a 'new man'."--Jacket. This
fascinating cultural and intellectual history focuses on
education as practiced by the imperial age Romans, looking
at what they considered the value of education and its effect
on children. W. Martin Bloomer details the processes,
exercises, claims, and contexts of liberal education from the
late first century b.c.e. to the third century c.e., the epoch of
rhetorical education. He examines the adaptation of Greek

institutions, methods, and texts by the Romans and traces the Romans' own history of education. Bloomer argues that whereas Rome's enduring educational legacy includes the seven liberal arts and a canon of school texts, its practice of competitive displays of reading, writing, and reciting were intended to instill in the young social as well as intellectual ideas. When a meteorite lands in Surrey, the locals don't know what to make of it. But as Martians emerge and begin killing bystanders, it quickly becomes clear—England is under attack. Armed soldiers converge on the scene to ward off the invaders, but meanwhile, more Martian cylinders land on Earth, bringing reinforcements. As war breaks out across England, the locals must fight for their lives, but life on Earth will never be the same. This is an unabridged version of one of the first fictional accounts of extraterrestrial invasion. H. G. Wells's military science fiction novel was first published in book form in 1898, and is considered a classic of English literature. This is a truly paradigm-shifting study that reads a key text in Latin Humanist studies as the culmination, rather than an early example, of a tradition in university drama. It persuasively argues against the common assumption that there was no "drama" in the medieval universities until the syllabus was influenced by humanist ideas, and posits a new way of reading the performative dimensions of fourteenth and fifteenth-century university education in, for example, Ciceronian tuition on epistolary delivery. David Bevington calls it "an impressively learned discussion" and commends the sophistication of its use of performativity theory. Considering the ubiquity of rhetorical training in antiquity, the volume starts from the premise that every first-person

statement in ancient literature is in some way rhetorically modelled and aesthetically shaped. Focusing on different types of Greek and Latin literature, poetry and prose, from the Archaic Age to Late Antiquity, the contributions analyse the use and modelling of gender-specific elements in different types of first-person speech, be it that the speaker is (represented as) the author of a work, be it that they feature as characters in the work, narrating their own story or that of others. In doing so, they do not only offer new insights into the rhetorical strategies and literary techniques used to construct a gendered 'I' in ancient literature. They also address the form and function of first-person discourse in classical literature in general, touching on fields of research that have increasingly come into focus in recent years, such as authorship studies, studies concerning the ancient notion(s) of the literary persona, as well as a historical narratology that discusses concepts such as the narrator or the literary character in ancient literary theory and practice.

Chihuahuas are the world's tiniest dogs, but that doesn't stop them from being some of the bravest and boldest canines around! Right off the bat, you'll meet Zoey, a five-pound Chihuahua who saved her one-year-old companion from a rattlesnake bite by getting bitten herself! Where did this courage come from? Perhaps it came from the Chihuahua's ancestors, who lived with the Toltecs and Aztecs of Mexico as far back as 1,000 years ago. Today, the little dog is found in the homes of everyday citizens, in movies such as *Legally Blonde*, and even in Taco Bell commercials. Chihuahua: *Señor Tiny* is a narrative treat for dog lovers that includes amazing, real-life stories about these little pups while also

recounting the breed's history and its relationship to the animal's physical characteristics, personality, and suitability as a pet. Chihuahua: Señor Tiny is part of Bearport's Little Dogs Rock! series. Tacitus, Suetonius, and Juvenal all figure in Bartsch's shrewd analysis of historical and literary responses to the brute facts of empire; even the Panegyricus of Pliny the Younger now appears as a reaction against the widespread awareness of dissimulation. These essays provide the first interdisciplinary assessment of the links between the Anglo-Saxons and the Irish before 800. This overview of recent advances in the field ranges widely in scope, covering language and literature, legal traditions, ecclesiastical history, and the evidence of material culture, through art history and archaeology. The Oxford Handbook of Dante contains forty-four specially written chapters that provide a thorough and creative reading of Dante's oeuvre. It gathers an intergenerational and international team of scholars encompassing diverse approaches from the fields of Anglo-American, Italian, and continental scholarship and spanning several disciplines: philology, material culture, history, religion, art history, visual studies, theory from the classical to the contemporary, queer, post- and de-colonial, and feminist studies. The

volume combines a rigorous reassessment of Dante's formation, themes, and sources, with a theoretically up-to-date focus on textuality, thereby offering a new critical Dante. The volume is divided into seven sections: 'Texts and Textuality'; 'Dialogues'; 'Transforming Knowledge'; 'Space(s) and Places'; 'A Passionate Selfhood'; 'A Non-linear Dante'; and 'Nachleben'. It seeks to challenge the Commedia-centric approach (the conviction that notwithstanding its many contradictions, Dante's works move towards the great reservoir of poetry and ideas that is the Commedia), in order to bring to light a non-teleological way in which these works relate amongst themselves. Plurality and the openness of interpretation appear as Dante's very mark, coexisting with the attempt to create an all-encompassing mastership. The Handbook suggests what is exciting about Dante now and indicate where Dante scholarship is going, or can go, in a global context. Drawing on the Roman Inquisition's own records, diplomatic correspondence, local documents, newsletters, and other sources, Thomas F. Mayer provides an intricately detailed account of the ways the Inquisition operated to serve the papacy's long-standing political aims in Naples, Venice, and Florence between 1590 and 1640. Focuses on the scholarly interests of the intellectual elites during the last two centuries of Byzantium and the cultural environment in which they flourished, as well as the interaction between secular and church circles in Constantinople, Thessaloniki, Athos and beyond. This book explores representations of the individualistic character in drama, Shakespearean and non-Shakespearean, and some of the Renaissance ideas allowing for and informing them.

Setting aside Shakespearean exceptionalism, the study reads a wide variety of plays to explain how intellectual context could allow for such characterization. This volume presents studies of some of the key artistic manifestations in Catalonia in recent times, a period of innovation and experimentation, and addresses issues concerning literature, film, theatre and performance art. From the creation of a new popular theatre in the work of the Valencian playwright Rodolf Sirera, or the conception of landscape, myth and memory in the late work of the novelist Mercè Rodoreda and the urgency of memory and remembrance in the writings of Jordi Coca, the effects of censorship in Catalonia appear to have proved a spur and a challenge to writers. Desiring to occupy illegal spaces, performance groups have manifested both literally and metaphorically the international dimension of Catalan culture in the modern period, posed in the present volume by the instances of La Cubana and Els Joglars, and further evidenced in the cross-fertilization in the work of contemporary Catalan playwrights and filmmakers to foreground issues of national plurality and tensions arising between the periphery (Catalonia) and the centre (Spain and Castile). This highly-anticipated volume has been extensively revised to reflect changes in technology, digital humanities methods and practices, and institutional culture surrounding the valuation and publication of digital scholarship. A fully revised edition of a celebrated reference work, offering the most comprehensive and up-to-date collection of research currently available in this rapidly evolving discipline Includes new articles addressing topical and provocative issues and ideas such as retro computing,

"... and still we could never suppose that fortune were to be so friendly to us, such as to allow us to be perhaps the first in handling, as it were, the electricity concealed in nerves, in extracting it from nerves, and, in some way, in putting it under everyone's eyes." With these words, Luigi Galvani announced to the world in 1791 his discovery that nervous conduction and muscle excitation are electrical phenomena. The result of

more than years of intense experimental work, Galvani's milestone achievement concluded a thousand-year scientific search, in a field long dominated by the antiquated beliefs of classical science. Besides laying the grounds for the development of the modern neurosciences, Galvani's discovery also brought to light an invention that would forever change humankind's everyday life: the electric battery of Alessandro Volta. In an accessible style, written for specialists and general readers alike, *Shocking Frogs* retraces the steps of both scientific discoveries, starting with the initial hypotheses of the Enlightenment on the involvement of electricity in life processes. So doing, it also reveals the inconsistency of the many stereotypes that an uncritical cultural tradition has imparted to the legacies of Galvani and Volta, and proposes a decidedly new image of these monumental figures.

Warfare Since the Second World War presents a wealth of analysis and data about one of the most pressing questions of our time: why does war continue to plague us fifty years after World War II? This book argues that the nature of war has shifted from inter-state conflicts toward internal conflicts, above all civil war. Low-intensity conflict helps explain the constant increase in wars over the last fifty years and makes it probable this trend will continue.

Gantzel and Schwinghammer argue that modern warfare reflects a continuation of the nation-state-building process begun in nineteenth-century Europe. In their analysis, economic modernization and social integration destroy traditional relations and create instability in the developing world. While these forces were successfully harnessed by the modern state in Europe and North America, economic and

political globalization make a similar resolution considerably more complex. In addition to their insightful analysis, the authors provide a detailed list of all wars fought from 1945 to 1995. The authors' lucid explanatory commentaries are accompanied by lists, tables, and charts. In addition to a detailed war register, upon which all statistical data and analyses for the volume are based, there are appendices with directories useful for locating specific wars, as well as several supplementary lists. An afterword brings the reader closer to the world situation as we conclude the twentieth century; including the impact of political developments in Eastern Europe. Beyond its historical dimension, this book offers a policy-relevant empirical demonstration of the ongoing increase in internal (civil) wars and addresses the inability of modern society to prevent this scourge. Warfare Since the Second World War is an indispensable resource for anyone concerned with issues of war and peace, development, and the future of international relations.

When she died in 2016, Dr Jennifer O'Reilly left behind a body of published and unpublished work in three areas of medieval studies: the iconography of the Gospel Books produced in early medieval Ireland and Anglo-Saxon England; the writings of Bede and his older Irish contemporary, Adomnán of Iona; and the early lives of Thomas Becket. In these three areas she explored the connections between historical texts, artistic images and biblical exegesis. This volume brings together seventeen essays, published between 1984 and 2013, on the interplay of texts and images in medieval art. Most focus on the manuscript art of early medieval Ireland and England. The first section includes four studies of the

Codex Amiatinus, produced in Northumbria in the monastic community of Bede. The second section contains seven essays on the iconography and text of the Book of Kells. In the third section there are five studies of Anglo-Saxon Art, examined in the context of the Benedictine Reform. A concluding essay, on the medieval iconography of the two trees in Eden, traces the development of a motif from Late Antiquity to the end of the Middle Ages. "To teach correct Latin and to explain the poets" were the two standard duties of Roman teachers. Not only was a command of literary Latin a prerequisite for political and social advancement, but a sense of Latin's history and importance contributed to the Romans' understanding of their own cultural identity. Put plainly, philology-the study of language and texts-was important at Rome. Critics, Compilers, and Commentators is the first comprehensive introduction to the history, forms, and texts of Roman philology. James Zetzel traces the changing role and status of Latin as revealed in the ways it was explained and taught by the Romans themselves. In addition, he provides a descriptive bibliography of hundreds of scholarly texts from antiquity, listing editions, translations, and secondary literature. Recovering a neglected but crucial area of Roman intellectual life, this book will be an essential resource for students of Roman literature and intellectual history, medievalists, and historians of education and language science. This volume analyses the process of creative adaptation which shaped the beginnings of Latin literature. More than at any time in the past, Roman Catholics & evangelicals are working together. They are standing shoulder to shoulder against social evils. They are

joining across denominational boundaries in renewal movements. And many evangelicals are finding the history, tradition, and grandeur of the Roman Catholic Church appealing. This newfound rapport has caused many evangelical leaders and laypeople to question the age-old disagreements that have divided Protestants and Catholics: Aren't we all saying the same thing in different language? The Roman Catholic Controversy is an absorbing look at current views of tradition and Scripture, the Papacy, the Mass, Purgatory, indulgences, and Marian doctrine. James White affirms that evangelicals and Catholics share common ground on some points. Yet there are crucial differences that remain regarding the Christian life--and the heart of the Gospel itself--that cannot be ignored. This handbook for teachers provides both practical, up-to-date guidance and a theoretical overview on a number of key topics in Latin teaching. Using a wealth of interviews, observations and pupil transcripts, Steven Hunt title utilizes case-study evidence of excellent practice in teaching and learning from a wide variety of institutions: from outreach programmes, community schools and academies in the UK, to New York Charter Schools, KIP schools and schools in Eastern Seaboard states in the USA. Offering practical advice on topics such as essay writing, teaching controversial topics including women, slavery, ethnicity and social hierarchy, making use of primary sources and using ICT to advance language skills, the book also engages with broader questions of approach and theory. These include a survey of the three main approaches to Latin teaching: grammar-translation, communicative and reading approaches; explanation of

cognitive and social approaches to learning; and analysis of the differences between intrinsic and extrinsic motivation. Moreover, traditional arguments about the value and purpose of learning Latin at school level are re-examined in the light of current educational thinking and government policy-making. This book is invaluable for trainees, newly qualified teachers and more experienced practitioners looking for practical ideas and strategies to motivate and engage learners of Latin. A companion website www.startingtoteachlatin.org is under construction and will contain a range of resources and information for teachers. Roman tragedies were written for over three hundred years, but only fragments remain of plays that predate the works of Seneca in the mid-first century C.E., making it difficult to define the role of tragedy in ancient Roman culture. Nevertheless, in this pioneering book, Mario Erasmo draws on all the available evidence to trace the evolution of Roman tragedy from the earliest tragedians to the dramatist Seneca and to explore the role played by Roman culture in shaping the perception of theatricality on and off the stage. Performing a philological analysis of texts informed by semiotic theory and audience reception, Erasmo pursues two main questions in this study: how does Roman tragedy become metatragedy, and how did off-stage theatricality come to compete with the theatre? Working chronologically, he looks at how plays began to incorporate a rhetoricized reality on stage, thus pointing to their own theatricality. And he shows how this theatricality, in turn, came to permeate society, so that real events such as the assassination of Julius Caesar took on theatrical overtones, while Pompey's theatre opening and the lavish

spectacles of the emperor Nero deliberately blurred the lines between reality and theatre. Tragedy eventually declined as a force in Roman culture, Erasmo suggests, because off-stage reality became so theatrical that on-stage tragedy could no longer compete. The world's bestselling introductory Latin course. Una valiosa aplicación de las teorías de Piaget y Kohlberg a la práctica de la educación ética, redactado con un estilo sencillo y asequible. A variety of new perspectives and fresh insights into people and society in fifteenth-century England and France are gathered together here. We learn from contemporary accounts of the battle of Anthon how regional politics in theDauphiné were enmeshed in the broader conflict over the French throne; subtle inferences about East Anglian politics in the fifteenth century are derived not only from a detailed study of stained glass, but also from a close examination of Sir John Fastolf's papers; the motivations of members of guilds in founding almshouses in their towns, and how such establishments functioned, are presented for our deeper understanding; relations between Humphrey, dukeof Gloucester, and the citizens of London at crucial stages of Henry VI's reign are explored anew; the celebration of the accession of Edward

IV by the artistic endeavours of a clerk of the staple of Calais gives our study of the period a new visual dimension; and a drama perhaps performed in the household of Cardinal Morton throws a new perspective on contemporary attitudes towards the nobility and Henry VII's "new men".
