I call Personal Electric Vehicles IEVs. That's because people want their Electric Vehicle to be more personal. They want it to resonate with who they are (I). Can you blame them? Some call these vehicles micromobility. An IEV is like your alter ego. For some people, this would be a Tesla or a Nissan Leaf. But, IEVs are more personal. That means they're typically smaller. Often they're smaller or not much bigger than the driver / rider. Ask yourself these questions. If I put wheels on my feet and added some batteries for electricity, what would I transform into? How fast would I be able to go? And, how much fun could I have getting there? That's the IEV for you. What is a Personal Electric Vehicle (IEV)? How am I defining them?

#1 It's Fully Electric: I won't be including any Hybrid Vehicles which use fossil fuels. #2 It's Personal: This vehicle not only gets you around, it is the definition of who you are. #3 It's Usually for One Person: One part of whether a vehicle is personal or not, is its capacity. While personal seems to imply one person, I'm going to include vehicles which hold two. You might normally be the only person in or on your vehicle. However, every so often, you might want to or need to, take someone else along. Perhaps you never go anywhere without your BFF. So, what kind of vehicles are we talking about here? Electric Skateboards, e-bikes, Micro cars and many more. I cover IEVs that travel on the ground - on the street and off-road. I cover those that go in and under the water and those which fly. I look at vehicles which are used on the farm and in the warehouse. The best part, is that I help you create an evaluation check-list for when you buy your IEV - the personal electric vehicle that is you.

In the 1960s and 1970s, John Deere's tractors evolved dramatically from small machines into large, powerful tractors with modern advances and muscular engines; it was a period of the greatest changes since the 1920s. Deere christened these tractors the New Generation. This book in the Tractor Legacy series examines these Big Green machines in detail, with archival and current photography of restored tractors, a thorough historical text, and details of model specifications and variations.

FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations. From the host of the YouTube channel that went viral—Dad, How Do I?—comes a book that's part memoir/part inspiration/part DIY. Rob Kenney's father left him and his seven siblings when he was fourteen years old, and the youngest had to fend for themselves. He wished that he had someone who could teach him the basics—how to tie a tie, jump-start a car, unclog a drain, use tools properly—as well as succeed in life. But he and his siblings had to figure these things out on their own. Now a father himself, Rob decided that he would help people out by providing how-to tips as well as advice—and even throw in some bad dad jokes. He started a YouTube channel for anyone looking for fatherly advice, and in the course of three months, gained a following of nearly 2.5 million subscribers, with millions of views for his how-to and inspirational videos. In this book, Rob shares his story of overcoming a difficult childhood with the strength of faith and family, and offers inspiration and hope. In addition, he provides 50 practical DIY instructions (30 of which will be unique to the book), illustrated with helpful line drawings.

Lawns now blanket thirty million acres of the United States, but until the late nineteenth century few Americans had any desire for a front lawn, much less access to seeds for growing one. In her comprehensive history of this uniquely American obsession, Virginia Scott Jenkins traces the origin of the front lawn aesthetic, the development of the lawn-care industry, its environmental impact, and modern as well as historic alternatives to lawn mania. Angry Man! Go Away! presents the true story of the life of author Raje E. Voega, who was raised by an abusive father who beat his mother and him often. The oldest of eight children, he was very harsh with his siblings due to his father's actions; even so, as an adult he has never hit or been violent with anyone. Voega was born on the western coast of Canada and moved to Alberta when he was almost six. As a child, he was moved around a lot, from Edmonton to northern Alberta. At fifteen, he went to live with his father in Edmonton but only stayed for six months, although he remained in the area until he was nineteen. Eventually, he moved from that area and settled in western Canada, finally ending up in southern Alberta. In his early twenties, he started down a path that might have led his imprisonment or death, but he was able to turn his life around. Recently, he ended a relationship that put him in a very dark and hopeless place. But instead of crossing a line that would have destroyed both his life and others' lives forever, he decided to write about the violence that exists in families today. By telling his story in this memoir, he hopes to save others from the violence that he has endured, and at times created, in his family.
