This second edition of a well-received text, with 20 new chapters, presents a coherent and unified repository of recommender systems' major concepts, theories, methodologies, trends, and challenges. A variety of real-world applications and detailed case studies are included. In addition to wholesale revision of the existing chapters, this edition includes new topics including: decision making and recommender systems, reciprocal recommender systems, recommender systems in social networks, mobile recommender systems, explanations for recommender systems, music recommender systems, cross-domain

recommendations, privacy in recommender systems, and semantic-based recommender systems. This multi-disciplinary handbook involves world-wide experts from diverse fields such as artificial intelligence, human-computer interaction, information retrieval, data mining, mathematics, statistics, adaptive user interfaces, decision support systems, psychology, marketing, and consumer behavior.

Theoreticians and practitioners from these fields will find this reference to be an invaluable source of ideas, methods and techniques for developing more efficient, cost-effective and accurate recommender systems. About the book: Ind AS transition has resulted in high-quality, principles-based, globally comparable financial reporting of large Indian companies. The transition not only impacted the financial results of companies, but also caused far reaching consequential business impact. Since last two years, there have been several changes in Ind AS for example, amendments in the revenue

recognition standard and new leases standard has drastically changed the performance reporting in the balance sheet composition of companies. Further, certain Ind AS principles are implicitly complex, for example, the accounting for financial instruments, acquisitions and business combinations are quite nuanced and can get difficult to apply without proper understanding. Towards this end, this book attempts to provide insights and in-depth analysis on interpretative issues and complex principles in the Ind AS standards. Ind AS contains extensive presentation and disclosure requirements. The relevant chapters extensively deal with these requirements with illustrative examples. To simplify the reading experience, the chapters include a brief, easy to understand, summary of the relevant standard, followed by Frequently Asked Questions (FAQs) on the chapter. Coronavirus (COVID-19) has also resulted in widespread economic uncertainty and disruption of businesses. There have been

far reaching implications on financial reporting. These circumstances would potentially present entities with several challenges when preparing their financial statements. This Edition covers some of the key financial reporting implications by way of FAQs in related chapters that companies need to consider along with the possible approaches that they may consider to dealing with the same keeping in view the business objectives, financial covenants and the accounting standards. This book is intended to help the companies to identify Ind AS requirements that are relevant to them and evaluate various accounting policy choices available under Ind AS. The disclosure related issues would be useful to benchmark with the Ind AS/IFRS disclosures of major companies. Currently, there is limited literature of the Ind AS application issues. This book endeavors to provide guidance on these issues. The book would be an immensely useful referencer for professionals, practitioners and corporates.

Commentary William Logan's Malabar is popularly known as 'Malabar Manual'. It is a huge book of more than 500,000 words. It might not be possible for a casual reader to imbibe all the minute bits of information from this book. However, in this commentary of mine, I have tried to insert a lot of such bits and pieces of information, by directly quoting the lines from 'Malabar'. On these quoted lines, I have built up a lot of arguments, and also added a lot of explanations and interpretations. I do think that it is much easier to go through my Commentary than to read the whole of William Logan's book 'Malabar'. However, the book, Malabar, contains much more items, than what this Commentary can aspire to contain. This book, Malabar, will give very detailed information on how a small group of native-Englishmen built up a great nation, by joining up extremely minute bits of barbarian and semi-barbarian geopolitical areas in the South Asian Subcontinent. appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance. The figure and item number index lists figure and item numbers in alphanumeric sequence and cross-references NSN, FSCM/CAGE and part numbers. Technology enhanced learning (TEL) aims to design, develop and test sociotechnical innovations that will support and enhance learning practices of both individuals and organisations. It is therefore an application domain that generally covers technologies that support all forms of teaching and learning activities. Since information retrieval (in terms of searching for relevant learning resources to support teachers or learners) is a pivotal activity in TEL, the deployment of recommender systems has attracted increased interest. This brief attempts to provide an introduction to recommender systems for TEL settings, as well as to highlight their particularities compared to recommender

systems for other application domains.
