The Edgeryders guide to the future May 14 2021 This publication is the result of the Edgeryders project, an online dialogue platform run by the Council of Europe with a view to promoting discussion with young people on the challenges of their transition to working life. Given that the imagination and the experiences of young citizens can only be understood in the context of horizontal relations (learning through sharing and joint management) in line with the networking approach, which restores the significance of individual effort and provides innovative solutions, a programme such as Edgeryders can provide a future-oriented alternative. In turn, institutions must show creativity. It is no longer a case of managing inertia, but above all of creating a balance between what the public authorities can do and what they can facilitate. By adopting a spirit of co-operation, the authorities can encourage the sharing of responsibilities, ideas, goods and values, while opening up to mutual learning. Nevertheless, this type of interaction is only possible if two conditions are met. Firstly, institutions must show a clear desire to ensure unprecedented scope for dialogue with young people by ascribing a high value to the proposals that emerge from the contacts among and with young citizens. Secondly, young people's interest in public affairs must be maintained in the long term by shoring up the online exchange with concrete evidence of legitimacy. This publication is intended to help meet these two conditions.

CSR and Climate Change Implications for Multinational Enterprises Dec 29 2019

Multinational economic actors, particularly corporations, play a defining role in the response to the climate change or warming debate and the emerging scientific consensus. This book describes, explains, and predicts how multinational firms will rise to the multiple challenges posed by global climate issues and the organizational and behavioral various responses of the international corporate community. It focuses on three core research and learning objectives. Firstly, it develops the core idea that multinational enterprises cannot implement meaningful sustainability initiatives without an appropriate governance system and corporate culture. Building on this notion, it addresses the question of environmental sustainability across select industry sectors, such oil and banking. Finally, drawing on a diverse range of contributing experts, it presents select best practices such as the opportunities arising from smart technologies implementation to achieve symbiotic industrial relationships, directed particularly towards the ecological environment of these firms' transborder operations and global reach.

Your User's Manual May 26 2022 What is the point? What is the purpose of life? Why must I suffer the stress, and anxiety that comes with it? Why does it all seem so hard and so unfair? If

you have asked yourself any of these questions, then you have found the book you are looking for. There are answers to all of these questions and Anderson Silver has compiled teachings from Stoicism and other schools of thought in *Your User's Manual*. This refreshing collection not only gives the reader much sought after answers, but also provides the tools for finding purpose, and living an anxiety-free life in the modern world. Meant as a light read that the reader can come back to and meditate on periodically, Anderson has done a wonderful job of condensing fundamental teachings, making *Your User's Manual* a straightforward read in answering life's most pressing questions and recognizing what is truly important.

The Startup Owner's Manual Jun 26 2022 More than 100,000 entrepreneurs rely on this book for detailed, step-by-step instructions on building successful, scalable, profitable startups. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, co-creator with Eric Ries of the "Lean Startup" movement and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams, plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you: • Avoid the 9 deadly sins that destroy startups' chances for success • Use the Customer Development method to bring your business idea to life • Incorporate the Business Model Canvas as the organizing principle for startup hypotheses • Identify your customers and determine how to "get, keep and grow" customers profitably • Compute how you'll drive your startup to repeatable, scalable profits. The Startup Owner's Manual was originally published by K&S Ranch Publishing Inc. and is now available from Wiley. The cover, design, and content are the same as the prior release and should not be considered a new or updated product.

Blue Ridge 2020 Jul 28 2022 The mountain chain known as the Blue Ridge traces a 550-mile arc through Pennsylvania, Virginia, North Carolina, Tennessee, South Carolina, and Georgia. Along the way, it encompasses Shenandoah National Park, Great Smoky Mountains National Park, the Blue Ridge Parkway, seven national forests, numerous federal wilderness areas and state parks, and parts of the Appalachian Trail. It is the largest concentration of public lands east of the Mississippi and home to an astonishing diversity of plant and animal life. But as the most extensive natural area in the increasingly populous Southeast, the Blue Ridge ecosystem faces unique challenges in the next decades. Drawing on scientific research in a variety of disciplines,

journalist Steve Nash provides a clear and evenhanded introduction to some of the most hotly disputed environmental issues facing the Blue Ridge, including the invasion of exotic plants and insects, the explosive growth of suburban-style communities in natural areas, worsening air and water pollution, and the erratic management of national forests. Informative and highly readable, *Blue Ridge 2020* takes a hard look at what is at risk in these mountains and what we--as the "owners" of the public lands--must do if we intend to preserve their future.

Watching the Directives Mar 31 2020 The EU Physical Agents (Electromagnetic Fields) Directive (which was adopted in April 2004 and must be enshrined in law in EU member states by April 2008) sets out exposure limits designed to provide a minimum standard of protection from occupational exposure to electromagnetic fields (EMF). The Committee's report focuses on the impact of this Directive on the use of magnetic resonance imaging (MRI) equipment for diagnosis, treatment and research use. This is the first of three case studies under the Committee's over-arching inquiry into the way scientific evidence and advice is used by the UK Government to influence policy at EU level. It finds that there were failings in the way scientific advice was used to inform the Directive, both in Brussels and in the UK. The European Commission relied too heavily on one source of advice and was not sufficiently responsive to concerns raised by the magnetic resonance community, whilst there was serious failings in the consultation process in the UK, particular by the Health and Safety Executive and by the Health Protection Agency.

Public Communication in the European Union Jun 14 2021 This book is a collection of essays that analyse and discuss EU information and communication policies and activities towards, with, by different publics developed both by the EU institutions at the European, national and local levels and by public organizations and civil society actors. Throughout six thematic parts, the authors examine from different theoretical perspectives (political communication, journalism, public relations and public diplomacy, political science, and cultural studies) and reflect on what it means for the European Union to communicate in multi-national and multi-cultural settings. The originality and strength of this book stand on the capacity to discuss EU communication policies, strategies and actions in their diverse features and, at the same time, to have a clear general picture of the role and function that communication has within the European Union's governance. The combination of different theoretical frameworks with the latest empirical research findings makes this book a fresh and fascinated collection of insights of what the European Union can achieve with strategic communications.

The Aging Mind Nov 19 2021 No-one approaches aging with enthusiasm. Activities we accomplish easily in our 20s and 30s become more difficult as we grow old but, though change is inevitable, recognising and understanding precisely what is happening to our bodies and minds allows us to continue to manage and enjoy our lives. Patrick Rabbitt is a cognitive gerontologist who has researched physical and mental aging for over 50 years and so can interpret his personal daily experiences of the aging process through a comprehensive understanding of what gerontological research has revealed about how our bodies and brains age, and how these changes affect our everyday experiences and lives. Engagingly written, Professor Rabbitt's book is a fascinating account of why our sensory and cognitive experiences change as we get older, and what these developments mean for our overall physical and emotional well-being.

Describing the latest research the book covers the mental changes that affect our daily lives such as those in memory, intelligence, attention, sleep, vision and hearing, taste and smell, touch and balance, anxiety, depression and perception of the passage of time. It also discusses how far we can keep and develop the skills we have mastered over our lifetimes. The book debunks unhelpful myths about the aging process and offers guidance on how we can age better. This is an absorbing account of the aging process from one of the most eminent gerontologists working

today. Its warmth and candour make it an engaging and helpful guide for those interested in understanding their own, or their relatives' ageing. Its rigour and comprehensiveness make ideal for students seeking an accessible alternative to standard textbooks on aging and for health professionals working with older people.
