With the introduction of Blood Oxygen Sensor and App, Always-On Altimeter, Family Setup and Optimization Features for the Entire Family, the Apple Watch Series 6 has made its mark is the BEST health and Fitness watch you can lay your hands on out there. Also, with the always-on displays to GPS navigation, Apple Watch has become more than a companion gadget to the iPhone; it's become a stand-alone device that is hard to live without. In addition to all the great features Apple Watch has always had, Series 5 has a slimmer body (yet with a screen that is somehow bigger), has optional cellular for making phone calls and streaming music without your phone, and drop detection (so if you fall and can't get up, the fire department is dispatched to your location). Everything about it was designed to motivate you to be more active. Apple Watch Series 6 has taken it a step further by adding additional health and fitness features including sleep monitor and Always-On Altimeter. Something, it should be noted, all these new features runs smoothly without sacrificing battery. As amazing as all the new features are, it's not quite as easy to use as an iPhone; the lack of buttons, the smaller screen, and general UI can make a frustrating initial experience.
