The standard mode of transportation for decades in Europe, motor scooter was a cult "fun" vehicle in the USA until the past two years. With oil prices soaring and the 20-to-40 set looking for alternative means of commuter (and weekend cruising) travel, motor scooter have exploded across the United States. In 2001, less than 30,000 scooters cruised U.S. roadways. In 2005, over

100,000 are road-bound, and the number is growing by double digits each year. Beginning at \$1,000 and ranging up over \$5,000, dozens of models of scooters are available, as are thousands of accessories. And scooter clubs meet from San Diego to Bangor, Maine. Every year, the largest gathering of motor scooters takes place in Indianapolis, speed capital of the world. *The Complete Idiot's Guide to Motor Scooters* is the perfect introduction to the wonderful world of motor scooting. Written by local experts, *Time Out Rome* provides extensive coverage of the major sights — and then goes much further. Featuring everything from born-again trattorie to the burgeoning aperitif trend, it offers visitors the chance to experience the Eternal City as the Romans do. History in Rome is not confined to museums, basilicas and galleries — it tumbles out everywhere. And though the city is reassuringly compact, this does not stop the cultural onslaught from being utterly bewildering and exhausting. While some travelers may have to face the fact that they probably won't see everything, it is also important not to shut oneself up inside all day looking at collections and sites or you will miss all that the outdoor scene has to offer. *Time Out Rome* helps travelers navigate through the cobblestone streets, so that they can eat, drink and shop like the natives. Suggested side trips out of town are also explored. It was May 2013 when Thomas Paradis convened in Siena, Italy, with a cohort of American faculty and students to lead a two-month inaugural study-abroad program. After a harrowing journey across the ocean, students and faculty alike soon realized that adapting to a foreign culture and language would be more challenging than they expected, especially amid one of the world's more authentic community festivals—the Palio horse race. Paradis weaves witty stories of personal discovery with a crash course on Siena and its ferocious twice-yearly horse race. As the July 2 race and its related rituals draw closer, Paradis details how he and his wife uncovered the impressive local communities that underlie the life and blood of the age-old Palio in order to better understand what drives the passion of its residents. When the race finally begins, Paradis provides a compelling upfront view of the action and the races aftermath, pulling in the collective experiences of his students as their eyes and minds open to seeing the world in an entirely new way. *Living the Palio* shares an amusing and instructional romp through Siena, Italy, as university faculty members and their students gain self-confidence, patience, and most importantly, respect for a different way of life. *Motorcycle maintenance made easy*: -- Aimed at the DIY mechanic and students embarking on courses in motorcycle engineering -- Service tasks are described in detail and illustrated with over 900 color photographs --Information on how to build up a toolkit and keep service records --Tools, testing and measuring equipment, oils and workshop equipment --Using a service schedule and keeping records --Engine:

However, these are typically based on past cases and assigned to students to solve. This book describes a new approach for teaching with case studies, which was developed and applied successfully at TUM School of Management. In this approach, student teams write and solve their own case study on a topic concerning current and future businesses. A case can thus be on their own startup or a strategic decision of existing companies. During the course, the students receive intensive coaching while selecting and developing the case topic by the course advisors as well as feedback by industry experts and executives for whom the case is actually a burning question. The authors present 17 cases covering strategic questions for startups and technology companies such as Deutsche Post, BMW, Ryanair, Lufthansa, Stadtwerke München, Fielmann, adidas, Siemens, Caribou Biosciences, eon, Airbus, Unicredit and UBS. Now the subject of the hit documentary *Scotty and the Secret History of Hollywood*, praised by *Vanity Fair* as “full of revelations” and *Entertainment Weekly* as “deliciously salacious,” *Full Service* is the remarkable true story of Scotty Bowers, the “gentleman hustler,” during the heyday of classic Hollywood. Newly discharged from the Marines after World War II, Bowers arrived in Hollywood in 1946. Young, charismatic, and strikingly handsome, he quickly caught the eye of many of the town’s stars and starlets. He began sleeping with some himself, and connecting others with his coterie of young, attractive, and sexually free-spirited friends. His own lovers included Edith Piaf, Spencer Tracy, Vivien Leigh, Cary Grant, and the abdicated King of England Edward VIII, and he arranged tricks or otherwise crossed paths with Tennessee Williams, Charles Laughton, Vincent Price, Katharine Hepburn, Rita Hayworth, Errol Flynn, Gloria Swanson, Noël Coward, Mae West, James Dean, Rock Hudson and J. Edgar Hoover, to name but a few. *Full Service* is not only a fascinating chronicle of Hollywood’s sexual underground, but also exposes the hypocrisy of the major studios, who used actors to propagate a myth of a

conformist, sexually innocent America knowing full well that their stars' personal lives differed dramatically from this family-friendly mold. As revelation-filled as Hollywood Babylon, Full Service provides a lost chapter in the history of the sexual revolution and is a testament to a man who provided sex, support, and affection to countless people. Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region. Inventing Mobility For All: Mastering Mobility-as-a-Service with Self-Driving Vehicles describes Mobility-as-a-Service and explains the impact of this mobility concept on social and societal life as well as on people's travel behavior.
