This book discusses strategies and methodologies for the storage and preservation of digital art and processes of collections digitization, also including studies on the new forms of organization and availability of information in data visualization systems. Furthermore, Possible Futures presents case studies and reflections on the rise of database aesthetics and the emerging field of information curatorship. The book was published in a copublishing agreement with Edusp. Fairies Afield" is a delightful children's book with kind and generous kids doing wonderfully lovely things, for which they receive magical prizes from fairies. It contains four charming stories. "Ask the Robin" deals with two orphaned sisters who need to survive on their own but may require help from fairies. "A Magic Table" is about three poor cousins who must earn the right to inherit their uncle's assets. "The Weather Maiden" revolves around a shy young girl having an awful time adapting to living with her aunt and uncle. "The Enchanted Trunks" deals with a girl who decides to travel with her cousin, but her main concern is being able to pack everything efficiently. Discover English provides a solid grammar and lexical syllabus with the perfect mix of variety and challenge to motivate young learners. Your students' learning journey begins here. Travel through time with Jo-Jo, Oscar and Mr Big. Explore foreign countries and learn about different cultures. Design computer games, break codes and learn about themselves. All this and more as their English improves Discover English... Discover the world! Printing on Polymers: Fundamentals and Applications is the first authoritative reference covering the most important developments in the field of printing on polymers, their composites, nanocomposites, and gels. The book examines the current state-of-the-art and new challenges in the formulation of inks, surface activation of polymer surfaces, and various methods of printing. The book equips engineers and materials scientists with the tools required to select the correct method, assess the quality of the result, reduce costs, and keep up-to-date with regulations and environmental concerns. Choosing the correct way of decorating a particular polymer is an important part of the production process. Although printing on polymeric substrates can have desired positive effects, there can be problems associated with various decorating techniques. Physical, chemical, and thermal interactions can cause problems, such as cracking, peeling, or dulling. Safety, environmental sustainability, and cost are also significant factors which need to be considered. With contributions from leading researchers from industry, academia, and private research institutions, this book serves as a one-stop reference for this field—from print ink manufacture to polymer surface modification and characterization; and from printing methods to applications and end-of-life issues. Enables engineers to select the correct decoration method for each material and application, assess print quality, and reduce costs Increases familiarity with the terminology, tests, processes, techniques, and regulations of printing on plastic, which reduces the risk of adverse reactions, such as cracking, peeling, or dulling

of the print Addresses the issues of environmental impact and cost when printing on polymeric substrates Features contributions from leading researchers from industry, academia, and private research institutions Gerard Medioni and Sing Bing Kang present advances in computer vision such as camera calibration, multi-view geometry, and face detection, and introduce important new topics such as vision for special effects and the tensor voting framework. They begin with the fundamentals, cover select applications in detail, and introduce two popular approaches to computer vision programming.

Cool writing journals with inspirational and hilarious quotes are the best choice for women, men, and adults to go spend their everyday with fun. Get this amazing sarcastic and hilarious journal and take it to work with you. Write all your important tasks, activities, and daily schedule in this journal and plan your entire day. 6x9 is the perfect size for handling. With matte finish and high quality white paper, this makes up to be the best journal you can get to plan your everyday routine. Maintaining a journal is a healthy activity. In the history of mankind, three revolutions which impact the human life are tool-making revolution, agricultural revolution and industrial revolution. They have transformed not only the economy and civilization but the overall development of the human society. Probably, intelligence revolution is the next revolution, which the society will perceive in the next 10 years. ICCD-2014 covers all dimensions of intelligent sciences, i.e. Intelligent Computing, Intelligent Communication and Intelligent Devices. This volume covers contributions from Intelligent Computing, areas such as Intelligent and Distributed Computing, Intelligent Grid & Cloud Computing, Internet of Things, Soft Computing and Engineering Applications, Data Mining and Knowledge discovery, Semantic and Web Technology, and Bio-Informatics. This volume also covers paper from Intelligent Device areas such as Embedded Systems, RFID, VLSI Design & Electronic Devices, Analog and Mixed-Signal IC Design and Testing, Solar Cells and Photonics, Nano Devices and Intelligent Robotics. In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive Indices covering 50-volume-lots are published separately. A Standing Order service is available for the Series and out-of-print volumes are available on microfiche. Presents literary criticism on the works of classical and medieval philosophers, poets, playwrights, political leaders, scientists, mathematicians, and writers from other genres. Critical essays are selected from leading sources, including published journals, magazines, books, reviews, and scholarly papers. Criticism includes early views from the author's lifetime as well as later views, including extensive collections of contemporary analysis. In the third in Katharine Ashe's Prince Catchers series, the eldest of three very different sisters must fulfill a prophecy to discover their birthright. But if Eleanor is destined to marry a prince, why can't she resist the scoundrel who seduced her? She can pour tea, manage a household, and sew a modest gown. In short, Eleanor Caulfield is the perfect vicar's daughter. Yet there was a time when she'd risked everything for a black-eyed gypsy who left her brokenhearted. Now he stands before her—dark, virile, and ready to escort her on a journey to find the truth about her heritage. Leaving eleven years ago should have given Taliesin freedom. Instead he's returned to Eleanor, determined to have her all to himself, tempting her with kisses and promising her a passion she's so long denied herself. But if he was infatuated before, he's utterly unprepared for what will happen when Eleanor decides to abandon convention—and truly live . . .

Looking for a great gift to show your appreciation and support for a friend? Need a new journal in your life? This unique funny notebook / journal is the perfect way to express your love and gratitude to your friends and family! Filled with 50+ double sided sheets (110 writing pages!) of lined paper, this inspirational notebook with motivational quote makes a memorable useful present for anybody. Give your friend an inspiring gift they'll remember! With a beautiful matte, full-color paperback cover, this cute lined notebook can be used as a diary to record all your creative stories. High quality ruled

journal of ideal size suitable for kids, women or men to write. Best cool small gift under \$10! Desired Awesome Journals are perfect for: Birthday Christmas Gifts New Job Gift Colleague/ Co-worker/ Boss Gifts Journals & Planners Doodle Diaries Homeschool Planners for Kids Creative Writing Notebooks Gifts for Mom Dad, Grandma Grandpa, Cousins, Brother Sister Retirement Gifts School Notebooks Student Graduation Gifts Teacher Thank You Gifts Mom Daughter Journal Journaling For Kids Book Lover Souvenir Novelty Blank Scrapbook Monthly Project Tracker Practical Plan Checklist And much more..... Place your order today! This book gives a comprehensive overview of the most advanced theories, methodologies and applications in computer vision. Particularly, it gives an extensive coverage of 3D and robotic vision problems. Example chapters featured are Fourier methods for 3D surface modeling and analysis, use of constraints for calibration-free 3D Euclidean reconstruction, novel photogeometric methods for capturing static and dynamic objects, performance evaluation of robot localization methods in outdoor terrains, integrating 3D vision with force/tactile sensors, tracking via in-floor sensing, self-calibration of camera networks, etc. Some unique applications of computer vision in marine fishery, biomedical issues, driver assistance, are also highlighted. This edited collection applies kinship as an analytical concept to better understand the affective economies, discursive practices, and aesthetic dimensions through which cultural narratives of belonging establish a sense of intimacy and affiliation. In North American and European ethnic literatures, kinship has several social functions: negotiating diasporic belonging in and outside of the perimeters of bloodlines and genealogy; positioning queer-feminist interventions to counter ethno-nationalist narratives of belonging; challenging liberal sentimentalist narratives, such as those grafted onto the bodies of transnational adoptees; re-formulating cultural heterogeneity through interracial and interethnic kinship constellations outside either post-racial assumptions about colorblindness or celebrations of racial and ethnic pluralism. In all of these cases, kinship features as a common theme through which contemporary authors attend to challenges of conscribing individuals into inclusive, counter-hegemonic cultural narratives of belonging. This journal can be used as a notebook or diary.

It is Perfect for taking notes, organizing daily activities, creating stories, making lists, doodling and brainstorming This Journal Features 119 high quality bright white pages with lines (27 lines per page) Full size duo sided blank sheets Sturdy and matte full color softbound cover 6 x 9" dimensions (5.24 x 22.86 cm); versatile & portable size for home and work Makes a Perfect Gift Idea for Father's Day, Thank you, Birthday, Farewell Party, Christmas Gifts... (Special Occasion Gifts) Journal & Planner Lovers Home Crafting Lovers Gifts for Boss or Colleague Gift Baskets & Stocking Stuffers

Click the orange "Add To Cart" button on the right to get it now! This journal is going to be discounted for a limited time ! This lecture presents research on a general framework for perceptual organization that was contacted mainly at the Institute for Robotics and Intelligent Systems of the University of Southern California. It is not written as a historical recount of the work, since the sequence of the presentation is not in chronological order. It aims at presenting an approach to a wide range of problems in computer vision and machine learning that is data-driven, local and requires a minimal number of assumptions. The tensor voting framework combines these properties and provides a unified perceptual organization methodology applicable in situations that may seem heterogeneous initially. Authors Philippos Mordohai and Gerard Medioni show how several problems can be posed as the organization of the inputs into salient perceptual structures, which are inferred via tensor voting. The book extends the original tensor voting framework with the addition of boundary inference capabilities, a novel re-formulation of the framework applicable to high-dimensional spaces and the development of algorithms for computer vision and machine learning problems. The authors provide complete analysis for some problems and briefly outline the approach for other applications and provide references to relevant sources. As the first man and woman leave the Garden I am with them. I feel their longing to return, their guilt and shame, and their fears about the future. I feel their anxiety about their Creator: Is He still with them? Does He still love them? I feel their rising panic as they realize that this no-longer-so-cozy world might make life impossible for them. As Abraham walks silently up the mountain to sacrifice his son I ask the questions he asks.

Should I obey the dictates of my God, or is there a higher good involving the sanctity of human life? Can I be Abraham if I refuse to listen to the God I revere? Can I be Abraham if my beloved God demands human blood for His adoration? As Jacob wrestles throughout the long dark night I am with him. Like Jacob, I sweat as he faces his betrayal of father and brother; as he witnesses, full-face, his character, naked and base. Then, the next morning, I weep as he and his brother weep. Join me on this pilgrimage into the wisdom that is Genesis. For this journey, it is Adam and Eve, Abraham, Isaac, Jacob, and even God who serve as guides. It is my fervent hope that by journey's end we will find ourselves.

Uma mudança nos modos de fazer arquitetura! É assim que Angelo Bucci, o mais destacado arquiteto brasileiro de uma geração que antecede aquela dos arquitetosassociados apresenta o livro. Seu olhar perspicaz desnuda a complexa trama da prática e da investigação teórica desde grupo cuja obra se desenvolve há mais de duas décadas e assinala um modo de pensar a arquitetura bastante singular no cenário da produção brasileira contemporânea. O livro se destaca ainda na própria forma de publicação, que evita o formato de portfólio comum em livros de arquiteturas: composta por duas partes, começa por um caderno de projetos que apresenta a obra coletiva do grupo; e se desdobra - literalmente- em um livro de ensaios que amplia o interesse da publicação para além do público iniciado nas discussões de arquitetura, iluminando aspectos operativos e conceituais à prática. Sem falar no acabamento primoroso com a costura aparente, miolo em pólen e capas em papel panamá. As obras selecionadas que integram o caderno de projetos são o Centro Educativo Burle Max, a Galeria Miguel do Rio Branco, a Galeria Cosmococa e a Galeria Claudia Andujar, todas em Inhotim, que sintetizam uma intensa pesquisa desenvolvida ao longo de anos na elaboração de projetos para a cultura; o edifício residencial Estúdios Capelinha, que apresenta um inserção não convencional na produção habitacional de mercado; e o redesenho urbano do entorno da Praça da Liberdade, que apresenta a visão dos arquitetos sobre a produção do espaço para a vida nas cidades como um suporte que ampara e estimula a experiência cotidiana, democrática e criativa dos espaços públicos na metrópole contemporânea. Responsáveis pela concepção de importantes edifícios da arquitetura brasileira recente, Alexandre Brasil, André Luiz Prado, Bruno Santa Cecilia, Carlos Alberto Maciel Paula Zasnicoff Cardoso mantêm em Belo Horizonte o escritório arquitetosassociados, que funciona como uma plataforma colaborativa dedicada a pensar a cidade e sua arquitetura. Seus trabalhos têm sido reconhecidos no Brasil e no exterior. A mais recente distinção é a escolha da Galeria Claudia Andujar para integrar o acervo Coleção Arquitetos Brasileira da Casa de Arquitetura, na cidade de Matosinhos, em Portugal, que apresentará em 2018 uma exposição com um panorama das 70 mais importantes obras de arquitetura brasileira, sendo 20 delas integrantes do período moderno e 50 projetos que fazem parte do período contemporâneo.

From basic concepts to research grade material, *Mobile Web 2.0: Developing and Delivering Services to Mobile Devices* provides complete and up-to-date coverage of the range of technical topics related to Mobile Web 2.0. It brings together the work of 51 pioneering experts from around the world who identify the major challenges in Mobile Web 2.0 applications and provide authoritative insight into many of their own innovations and advances in the field. To help you address contemporary challenges, the text details a conceptual framework that provides modeling facilities for context-aware, multi-channel Web applications. It compares various platforms for developing mobile services—from the developer and user perspectives—and explains how to use high-level modeling constructs to drive the application development process through automatic code generation. Proposes an expanded model of mobile application context Explores mobile social software as an Information and Communications Technology (ICT) Discusses the effect of context on mobile usability Through empirical study, the book tests a number of hypotheses on the use of software implementation technology and location context in mobile applications. It introduces Reusable End-User Customization (REUC)—a technique that allows users to adapt the layout of Web pages and automatically reapplies those preferences on subsequent visits. It also investigates the need for non-visual feedback with long system response times, particularly when downloading Web pages to mobile devices. The mind that created *Dreamt Things* and *Rhapsody*, along with the poetic *Things* has assembled his collection of short stories for a release entitled *The Short Things*. V, who formally

wrote under the name L.A. Shane exhibits his range with the short story "Southern Dead", a small tale about a curious character's decent into the underworld; he explores the depths of sadness with " Things no one cared for " ; he explores the complex nature of relationships with " Grasping Things " and " Cold " ; he even revisits scenes from " Things at the inn " . Whatever your tastes, you will find something you love in " The Short Things " . Track all staff wages with our handy all-in-one Payroll Ledger. Product Information Introductory Page to personalize. Gloss Paper Cover Finish. 6"x 9" Handy Book Size Paperback (15.24cmx 22.86cm). 110 Acid-free pages, pure white thick (55lb) paper to reduce ink bleed-through. Sections include: Earnings (Pay Period, Pay day Date, Name, Basic, Overtime, Bonuses, Gross Earnings), Deductions (Pay Period, Pay Day Date, Pension, Tax, Total Deductions, Net Pay) and Notes. Payroll sheet suitable for small business, companies, offices, entrepreneurs and many more. Remain Organized and get a Copy today. A comprehensive and practical analysis and overview of the imaging chain through acquisition, processing and display The Handbook of Digital Imaging provides a coherent overview of the imaging science amalgam, focusing on the capture, storage and display of images. The volumes are arranged thematically to provide a seamless analysis of the imaging chain from source (image acquisition) to destination (image print/display). The coverage is planned to have a very practical orientation to provide a comprehensive source of information for practicing engineers designing and developing modern digital imaging systems. The content will be drawn from all aspects of digital imaging including optics, sensors, quality, control, colour encoding and decoding, compression, projection and display. Contains approximately 50 highly illustrated articles printed in full colour throughout Over 50 Contributors from Europe, US and Asia from academia and industry The 3 volumes are organized thematically for enhanced usability: Volume 1: Image Capture and Storage; Volume 2: Image Display and Reproduction, Hardcopy Technology, Halftoning and Physical Evaluation, Models for Halftone Reproduction; Volume 3: Imaging System Applications, Media Imaging, Remote Imaging, Medical and Forensic Imaging 3 Volumes
www.handbookofdigitalimaging.com This enormous 484-page compendium documents the work of 15 of the leading Brazilian furniture designers in the modern period, between the 1940s and 1970s, including Lina Bo Bardi, Joaquim Tenreiro, José Zanine Caldas, Sergio Rodrigues and Jorge Zalsupin. The extensive selection of reproduction allows the reader to appreciate the details of the designers' creative thinking and the variety of aesthetic solutions. The accompanying text, by Maria Cecilia Loschiavo, examines the elements that brought about the genesis of modern Brazilian design, weaving an analysis that guides the reader to present dialogues between the arts. The book also includes a short biography of each of the designers, plus a chapter on the contributions made by architects to modern furniture design. SUMMARY: Describes the filmic action and gives the intratitles of the film.
