***It was the foul play that caused the annihilation of Fish, when the Devil was shot in the thick of a wrestling match. And there was only one way for the referee to put things right - with another murder. This work is a collection of stories, set partly in Jamaica, partly amongst the Jamaican diaspora of the United States. Saint Lucia is a Caribbean island that truly lives up to its travel brochure descriptions: an island of breathtaking beauty with miles of magnificent coastline, panoramic mountain views, lush vegetation, and favorable climate. Its people, history, language, and culture are a blend of the rich heritage of Africa, France, and England. It is the home of the only drive-in volcano in the world, where the fascinating Sulphur Springs bubble. Collins International Primary Maths supports best practice in primary maths teaching, whilst encouraging teacher professionalism and autonomy. A wealth of supporting digital assets are provided for every lesson, including slideshows, animations, tools and games to ensure they are rich, lively and engaging. Features works including A Cross for Easter - a whodunnit set on New Providence Island, The Bahamas; Master Thief - a Euro-Bahamian folk tale; and Sunday, Funday - the story of a tense but illuminating afternoon in the life of a rum drinking construction worker, Hezekiah Pratt. This book talks about providing the US with a national strategy that focusses on exploiting its***

*advantage, as a strategic broker, in crafting agreements on the rules for technological competition and the principles for military integration while being mor This book is the second in a series of three texts which cover the needs of students studying agriculture at the Junior Secondary Level. This book advances alternative approaches to understanding media, culture and technology in two vibrant regions of the Global South. Bringing together scholars from Africa and the Caribbean, it traverses the domains of communication theory, digital technology strategy, media practice reforms, and corporate and cultural renewal. The first section tackles research and technology with new conceptual thinking from the South. The book then looks at emerging approaches to community digital networks, online diaspora entertainment, and video gaming strategies. The volume then explores reforms in policy and professional practice, including in broadcast television, online newspapers, media philanthropy, and business news reporting. Its final section examines the role of village-based folk media, the power of popular music in political opposition, and new approaches to overcoming neo-colonial propaganda and external corporate hegemony. This book therefore engages critically with the central issues of how we communicate, produce, entertain, and build communities in 21st-century Africa and the Caribbean. This is a guide to the most frequently encountered and most brightly coloured species of butterflies to be found in the Caribbean and Florida, from Trinidad with its South American species to Florida and its North American endemics. Material in the book includes the nature and life-cycle of the butterfly, and a consideration of the area and variety of habitats. Over 80 species are described and illustrated. A atlas focusing on accurate mapping of al countries of the Caribbean, with thematic maps designed to illustrate the economic and social character of the region. World maps are incorporated from a series of Macmillan school atlases. This book provides the first wide-ranging account of the impact of the COVID-19 pandemic in two contrasting island regions - the Caribbean and the Pacific - and in several islands and island states. It traces the complexity of effects and responses, at different scales, through the first critical year. Written by a range of scholars and practitioners working in the region the book focuses on six key themes: public health; the economies (notably the collapse of tourism, the revival of local agriculture and fishing, and the rebirth of self-reliance, and even barter); the rescue by remittances; social tensions and responses; public policy; and future 'bubbles' and regional connections. Even with marine borders that excluded the virus all island states were affected by COVID-19 because of a considerable dependence on tourism – prompting urgent challenges for governance, economic management and development, as small states sought to balance lives against livelihoods in search of revitalisation or even a 'new normal'. Ian McDonald is South America's equivalent of Robert Frost; a poet writing in a young country who, with an open heart and in clean, honest language, has set down its characters and events, its landscape, traditions and*

*myths, for future generations to discover. Readers far beyond the Caribbean will come to admire his deft use of dialect; his nature poetry, steeped in the mysteries of the Guyanese interior; his sobering awareness of mortality. This selection by Edward Baugh, published for the poet's seventy-fifth birthday, sets the poems from McDonald's four collections in chronological order for the first time. As Baugh writes in his introduction, Ian McDonald's verse is 'irradiated by his celebration of life, his gratitude for happy days and for earth's bounty of joy'. Dedicated to creating effective communicators through a careful balance of grammar and writing, this series helps students obtain the skills instrumental to personal expression. An atlas that features modern digital cartography, Caribbean and world sections, and photographs and illustrations. Open Season This collection of stories is peopled mainly by rejects of society, sad and lonely souls trying to come to terms with, to survive in, antagonistic circumstances. This book traces American engagement in the English-speaking Caribbean from the eighteenth to the twenty-first century, and is the first to examine the policies of Presidents George W. Bush, Barack Obama and Donald Trump in this context. Focusing on The Bahamas, Jamaica, Trinidad and Tobago and Guyana as case studies, the book describes the growth of the English-speaking Caribbean and highlights American interest and foreign relations in this region from European discovery up through the post-9/11 era to today (1492-2019). The book demonstrates the unique relationship between America and the former British colonies, shedding light on U.S. foreign policy with the Caribbean in general and at a bilateral level with the four selected countries, providing a useful survey for students, scholars, diplomats, policymakers, governments officials, and anyone interested in gaining a better understanding of U.S. – Caribbean relations. "Alan was too young to understand why his parents preferred him to play with the other white boys on the estate. But gradually, he learned that if he was going to meet Kaiser and Jaillin, he had to pretend he was going to meet someone else, he had to pretend he didn't enjoy spending time with his friends, he had to pretend he didn't mind when he wasn't allowed to invite them to his party. Sometimes, horribly, the pretending became real, and Alan found himself in betrayal of the friendship that meant so much to him."--Goodreads. Originally published in 1954, this is the tragic story of an honest Rastafarian healer caught up in a web of intrigue and betrayal in Jamaica's tough West Kingston slums. It is a portrait of a ghetto saint - an ordinary man selected by the universe to bring enlightenment to poor belittled people. Offers a six-level course for primary and all-age schools. This book introduces a concept in course material for the Caribbean. It includes many Social Studies activities, and is illustrated with photographs and colour artwork. Dealing with the natural history of birds, " Birds of the Eastern Caribbean" provides an up-to-date review of over 300 species to be found in the islands. For each species, the key features are identified, followed by notes on status, distribution, habitat,*

*breeding biology, diet and behaviour. Photographs of many species are illustrated in colour for the first time. The guide includes helpful hints on bird-watching and bird photography. There is a useful bibliography, list of best bird-watching sites and an island by island check list of species recently observed, all included to help the visitor get the best out of bird-watching in the islands. This series covers all aspects of agriculture over the three years of the Junior Secondary educational programme. The topics covered within this third volume are systems of farming, vegetative propagation methods, production of crops, crop production technology, forestry, fishing, marketing, grasslands, pastures and forages, cattle rearing, farm records and agencies participating in agriculture. Opening a window on a dynamic realm far beyond imperial courts, anatomical theaters, and learned societies, Pablo F. Gomez examines the strategies that Caribbean people used to create authoritative, experientially based knowledge about the human body and the natural world during the long seventeenth century. Gomez treats the early modern intellectual culture of these mostly black and free Caribbean communities on its own merits and not only as it relates to well-known frameworks for the study of science and medicine. Drawing on an array of governmental and ecclesiastical sources—notably Inquisition records—Gomez highlights more than one hundred black ritual practitioners regarded as masters of healing practices and as social and spiritual leaders. He shows how they developed evidence-based healing principles based on sensorial experience rather than on dogma. He elucidates how they nourished ideas about the universality of human bodies, which contributed to the rise of empirical testing of disease origins and cures. Both colonial authorities and Caribbean people of all conditions viewed this experiential knowledge as powerful and competitive. In some ways, it served to respond to the ills of slavery. Even more crucial, however, it demonstrates how the black Atlantic helped creatively to fashion the early modern world. This book identifies and engages with an analysis of racism in the Caribbean region, providing an empirically-based theoretical re-framing of both the racialisation of the globe and evaluation of the prospects for anti-racism and the post-racial. This is an overarching account of Caribbean development within the framework of increasing globalization of the world economy. It charts the shifting politics of development within the countries of the Commonwealth Caribbean during the last 40 years era of independence for most of these countries. Caribbean Home Economics has been designed to equip students with all the essential skills needed for successful home making. The three course books are each divided into a series of sections which consider the following basic topics: the family, food and nutrition, textiles and clothing, consumer education, entertaining. The complete course covers all the requirements of the CXC Home Economics syllabus. Provides a useful reference not only to experienced botanists but also to everyone who is interested in identifying the flowering plants of The Bahamas and Turks and Caicos Islands. Here, the flowers*

*are grouped into colours and within each group they are listed alphabetically according to family and species. The language of Jamaican popular culture—its folklore, idioms, music, poetry, song—even when written is based on a tradition of sound, an orality that has often been denigrated as not worthy of serious study. In **Noises in the Blood**, Carolyn Cooper critically examines the dismissed discourse of Jamaica's vibrant popular culture and reclaims these cultural forms, both oral and textual, from an undeserved neglect. Cooper's exploration of Jamaican popular culture covers a wide range of topics, including Bob Marley's lyrics, the performance poetry of Louise Bennett, Mikey Smith, and Jean Binta Breeze, Michael Thelwell's novelization of *The Harder They Come*, the Sistren Theater Collective's *Lionheart Gal*, and the vitality of the Jamaican DJ culture. Her analysis of this cultural "noise" conveys the powerful and evocative content of these writers and performers and emphasizes their contribution to an undervalued Caribbean identity. Making the connection between this orality, the feminized Jamaican "mother tongue," and the characterization of this culture as low or coarse or vulgar, she incorporates issues of gender into her postcolonial perspective. Cooper powerfully argues that these contemporary vernacular forms must be recognized as genuine expressions of Jamaican culture and as expressions of resistance to marginalization, racism, and sexism. With its focus on the continuum of oral/textual performance in Jamaican culture, **Noises in the Blood**, vividly and stylishly written, offers a distinctive approach to Caribbean cultural studies.*

*Fruit growing in the tropical regions of the world is quite different from the more temperate areas where the majority of fruits are strictly seasonal and mostly ripen from mid-Summer to late Autumn. There is no off-season in tropical regions and the variety of available fruits in the Caribbean has increased with the introduction of new species from other parts of the tropical world. **Fruits Trees of the Caribbean** describes more than ninety varieties of trees and their fruits. In botanical terms some fruits will be known to many people as spices such as cinnamon and cloves or parts of the fruits such as nutmeg or mace. There is at least one species listed that cannot be eaten as it is poisonous. The description of trees and shrubs is comprehensive but what cannot be accurately described are the rich and varied flavours that are totally unique and delicious. The Caribbean Language Arts Project has been devised, piloted and thoroughly tested in primary schools by the Curriculum and Materials Development Unit of the St Lucia Ministry of Education. The course takes the child through the three distinct, but interrelated, elements of language learning: oral communication (listening and speaking), reading and writing. The main content in all the books is drawn from the everyday lives of the children with great use made of people, objects and scenes in the immediate environment. A science course for students in Caribbean primary schools. Developed to fulfil the requirements of primary science curricula throughout the region, it also includes separate teacher's guides, with*

*background information, teaching notes and support for remedial and extension activities.*
