Although most antelope species still exist in large numbers in sub-Saharan Africa (some in hundreds of thousands), up to three-quarters of the species are in decline. Threats to their survival arise from the rapid growth of human and livestock populations, with consequent degradation and destruction of natural habitats, and excessive offtake by meat hunters. In addition, some parts of Africa are now almost completely devoid of large wild animals because of uncontrolled slaughter during recent civil wars. This report presents the information currently held by the IUCN/SSC Antelope Specialist Group on the conservation status of each antelope species (and selected subspecies) in sub-Saharan Africa. Key areas have been identified for the conservation of representative antelope

communities. While external donors make the greatest contributions to the conservation of antelopes, greater recognition of wildlife conservation in national and regional development plans is often a critically important requirement. Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your

suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem. Provides an overall introduction to the welding process, illustrating most of the common equipment and work techniques for both the home and shop welding. 1 The natural environment, Limits of natural occurrence of the genus, Australian climatic conditions, Australian foest types; 2 Growth characteristics, aggressive mechanisms which permit rapid growth, 3 Systematics; 4 Eucalypts as plantation trees; 5

The papers presented here, written by experts from all parts of the globe, describe efforts that represent a revolutionary moment in the treatment of schizophrenia disorders as, with caution, we begin to shift the standard of treatment toward early intervention and prevention. Adobe Photoshop Lightroom is truly an awesome program, and the primary editing tool for so many photographers today. But, at some point, you realize that there are things you need to do to your images that Lightroom just can't do. It could be anything from pro-level portrait retouching, to blending two or more images together, to incredible special effects, to removing distracting things in your image, to adding beautiful type to your images, and, well...there are just lots of incredible things you could do...if you just knew Photoshop. Adobe Photoshop is...well...it's Photoshop—this

huge, amazing, Swiss Army knife of a program with 70+ tools, and more than a hundred filters. So, compared to Lightroom it seems really complicated, and it could be, but you've got a secret weapon: Scott Kelby. He's the same guy who wrote the world's #1 best-selling book on Lightroom, he's Editor and Publisher of Photoshop User magazine and Lightroom Magazine, and he's here to teach you just the most important, most useful parts of Photoshop—just the stuff that Lightroom can't already do. Once you learn these techniques (all covered in this short, quick, easy-to-use, plain-English guide), it opens a whole new world of productivity and creativity. Here's what you'll learn: Scott tells you flat-out which tools to use, which techniques work best, which ones to avoid, and why. You only really need about 20% of what Photoshop can do, and that 20% is all covered right in this book. The most important layer techniques, and learning layers

is like being handed the keys to the candy store—this is where the fun begins, and you'll be amazed at what you'll be able to do, so quickly and easily. Scott's favorite (and most useful) portrait retouching techniques; his favorite special effects for landscape, travel, and people photos; plus which filters are awesome (and which ones waste your time). Also, you'll learn how to mask hair and create super-realistic composites (you'll be amazed when you learn how easy this is), plus how to take advantage of all the latest Photoshop technology, how to leverage the latest features (so you're doing things the easy way), and a bunch of today's most popular techniques (the same commercial looks you're seeing in hot demand), so you'll be using Photoshop like a shark in no time. If you've been saying to yourself, "Ya know, I really should learn Photoshop," you're holding the absolute best book to get you there, coming from the guy who literally wrote the book on Lightroom. He knows how to

help you make the most of using these two powerful tools together to take your images (and your fun) to the next level. You are going to love being a Photoshop shark! This is a true story about a special relationship that developed between a wild desert bird and the owner and friends of a special house in the Western Mojave in California. If you have ever looked into the eyes of a wild animal, especially in its natural habitat, you know how special that moment can be. Anyone with a family pet knows the special bond between animal and man and it can be a truly amazing experience. In fact, most pet "owners" consider their animals to be an integral part of the family and include them in weddings, rely on them for protection and grieve upon their demise. Having an untamed animal not only approach you but maintain a constant presence throughout its life was transformative for me and became a defining part of my life. It is a story that is best shared and will hopefully

enrich yours as well. Sometimes you know things you're not supposed to know. Things that you can never un-know. Things that will change the course of your life...and the fate of the ones you love. I found her in our living room, bleeding and close to death, but alive. Barely. Until morning stole her last breath. The media called her killer the "Triangle Terror" ... and then forgot about her. But I never forgot—my murdered sister, and an investigation that led to my own resurrection from the dead. Twenty-two years ago, on a cold February night, Landon Worthington lost his father for the last time. After an armed robbery gone wrong, evidence and witness testimony pointed a shaky finger at Dan Worthington—deadbeat dad and alcoholic husband. But before the dust could settle over the conviction, Landon's preteen sister, Alexis, is murdered in their home, plunging Landon's life into further despair. Two decades and a cold case later, Landon is dogged by guilt over their

estranged relationship and decides to confront his incarcerated father about what really happened the night of the robbery. But the years of lies are hard to unravel. And the biggest question of all haunts him: How does everything tie into his sister's murder? And so begins Landon's journey to piece together the puzzle of secrets, lies, and truths that can free his father, avenge his sister, and perhaps save himself. A short story mystery perfect for fans of Robert Dugoni's *Third Watch* and Dean Koontz's *The Neighbor*. Read as a standalone or as the companion book to *A Secondhand Life*. Covering over 10,000km from the Atlas to the Sahara, Morocco Overland features detailed GPS off-road routes for 4WDs, motorcycles and mountain bikes as well as scenic byways suitable for any vehicle. In writing this monograph, the aim has been to consider the mechanical properties of the wide range of materials now available in such a way as to

start with the fundamental nature of these properties and to follow the discussion through to the point at which the reader is able to comprehend the significance or otherwise of the large amounts of data now available in design manuals and other compilations. In short, it is hoped that this volume will be used as a companion to these data compilations and as an aid to their interpretation. In attempting to cover such a wide field, a large degree of selection has been necessary, as complete volumes have been written on topics which here have had to be covered in a few pages or less. It is inevitable that not everyone will agree with the choice made, especially if it is his own subject which has been discussed rather briefly, and the author accepts full responsibility for the selection made. The book is written at a level which should be easily followed by a university graduate in science or engineering, although, if his background has not included a

course in materials science, some groundwork may be lacking. A multidisciplinary index covering the journal literature of the arts and humanities. It fully covers 1,144 of the world's leading arts and humanities journals, and it indexes individually selected, relevant items from over 6,800 major science and social science journals. Practical guide for anyone planning a long-distance motorcycling trip. Choosing, preparing and equipping a motorbike, documentation and shipping, life on the road, trans-continental route outlines: Asia, Africa & Latin America. Updated and now in full colour, this best-seller has been in print for almost 30 years. Inquiries in Science Biology Series: Synthesizing Macromolecules Teacher's Manual, Second Edition In 2011, at the height of tension between the British and Iranian governments, travel writer Lois Pryce found a note left on her motorcycle outside the Iranian Embassy in London: ... I wish that you will

visit Iran so you will see for yourself about my country. WE ARE NOT TERRORISTS!!! Please come to my city, Shiraz. It is very famous as the friendliest city in Iran, it is the city of poetry and gardens and wine!!! Your Persian friend, Habib Intrigued, Lois decides to ignore the official warnings against travel (and the warnings of her friends and family) and sets off alone on a 3,000 mile ride from Tabriz to Shiraz, to try to uncover the heart of this most complex and incongruous country. Along the way, she meets carpet sellers and drug addicts, war veterans and housewives, doctors and teachers - people living ordinary lives under the rule of an extraordinarily strict Islamic government. Revolutionary Ride is the story of a people and a country. Religious and hedonistic, practical and poetic, modern and rooted in tradition - and with a wild sense of humour and appreciation of beauty despite the comparative lack of freedom - this is real contemporary Iran.
