**How to Find a Job in Canada** Feb 28 2020 Annotation How to Find a Job in Canada is a guide to overcoming the barriers to employment typically faced by new immigrants. It teaches essential job-search skills, such as how to: create a career plan; gain a Canadian education; assess your international qualifications; and create a professional resume and cover letter. It also contains additional information that is invaluable to anyone new to Canada, such as: how the internet, today's most powerful source of information, can be used to help you with your job search; the many social services and programs specifically created for newcomers; and Canadian addresses, phone numbers, and Internet sites that can aid you in your job hunt.

**Rising Up** Sep 24 2019 Rising Up traces the history and international context of living wage movements across Canada. This compassionate and astute collection of essays shines a light on alternatives to a neoliberalized labour market, examining union- and community-based approaches to labour organizing, migrant labour, and media (mis)representations, among other key topics. Canada has one of the highest rates of low-wage work among advanced industrial economies. In a labour market characterized by the ongoing fallout from COVID-19, deepening income inequality, job instability, and diluted union representation, the living wage movement offers a response and solutions.

**Canadian Working-class History** May 01 2020 Canadian Working Class History: Selected Readings, Third Edition, is an updated version of the bestselling reader that brings together recent and classic scholarship on the history, politics, and social groups of the working class in Canada. Some of the changes readers will find in the new edition include: better representation of women scholars, and nine provocative and ground-breaking new

articles on racism and human rights, women's equality; gender history, Quebec sovereignty; and the environment.

**Working Women in Canada** Mar 23 2022 In this edited collection, Leslie Nichols weaves together the contributions of accomplished and diverse scholars to offer an expansive and critical analysis of women's work in Canada. Students will use an intersectional approach to explore issues of gender, class, race, immigrant status, disability, sexual orientation, Indigeneity, age, and ethnicity in relation to employment. Drawing from case studies and extensive research, the text's eighteen chapters consider Canadian industries across a broad spectrum, including political, academic, sport, sex trade, retail, and entrepreneurial work. Working Women in Canada is a relevant and in-depth look into the past, present, and future of women's responsibilities and professions in Canada. Undergraduate and graduate students in gender studies, labour studies, and sociology courses will benefit from this thorough and intersectional approach to the study of women's labour.

**Transforming Labour** Nov 06 2020 The increased participation of women in the labour force was one of the most significant changes to Canadian social life during the quarter century after the close of the Second World War. Transforming Labour offers one of the first critical assessments of women's paid labour in this era, a period when more and more women, particularly those with families, were going 'out to work'. Using case studies from across Canada, Joan Sangster explores a range of themes, including women's experiences within unions, Aboriginal women's changing patterns of work, and the challenges faced by immigrant women. By charting women's own efforts to ameliorate their work lives as well as factors that re-shaped the labour force, Sangster challenges the commonplace perception of this era as one of conformity, domesticity for women, and feminist inactivity. Working women's collective grievances fuelled their desire for change, culminating in challenges to the status quo in the 1960s, when they voiced their discontent, calling for a new world of work and better opportunities for themselves and their daughters.

Back to Work: Canada Improving the Re-employment Prospects of Displaced Workers Oct 18 2021 Job displacement (involuntary job loss due to firm closure or downsizing) affects many workers over their lifetime. Displaced workers may face long periods of unemployment and, even when they find new jobs, tend to be paid less than in their prior jobs. Helping them get back into good jobs ...

**Social Security Programs and Retirement Around the World** May 25 2022 In recent years, the retirement age for public pensions has increased across many countries, and additional increases are in progress or under discussion in many more. The seventh stage of an ongoing research project studying the relationship between social security programs and labor force participation, Social Security Programs and Retirement around the World: The Capacity to Work at Older Ages explores people's capacity to work beyond the current retirement age. It brings together an international team of scholars from twelve countries—Belgium, Canada, Denmark, France, Germany, Italy, Japan, the Netherlands, Spain, Sweden, the United Kingdom, and the United States—to analyze this issue. Contributors find that many—but not all—individuals have substantial capacity to work at older ages. However, they also consider how policymakers might divide gains in life expectancy between years of work and retirement, as well as the main impediments to longer work life. They consider factors that influence the demand for older workers, as well as the evolution of health and disability status, which may affect labor supply from the older population.

Policy Work in Canada Oct 30 2022 Policy Work in Canada is an in-depth study into the levels of analytical capacity found within the federal and provincial governments as well as the non-governmental sector. By focusing on the individuals who craft public policy in Canada, this collection of eighteen chapters broadens and deepens our understanding of policy development in Canada. The contributors to this volume empirically examine such topics as: the inherent characteristics of sophisticated policy analysis, the constraints that influence the outcome or style of analysis, the influence of policy analysis on democratic debate and lessons that can be learned from different jurisdictions within and outside of Canada. Policy Work in Canada provides a pathway for academics and public managers alike to meet the challenges involved in crafting more nuanced and sophisticated public policy head-on.

**Selling Sex** Sep 04 2020 "Despite being dubbed "the world's oldest profession," prostitution has rarely been viewed as a legitimate form of labour. Instead, it has been criminalized, sensationalized, and polemicized across the socio-political spectrum by everyone from politicians to journalists to women's groups. Interest in and concern over sex work is not grounded in the lived realities of those who work in the industry, but rather in inflammatory ideas about who is participating, how they wound up in this line of work, and what form it takes. In *Selling Sex*, Emily van der Meulen, Elya M. Durisin, and Victoria Love present a more nuanced, balanced, and realistic view of the sex industry. They bring together a vast collection of voices - including researchers, feminists, academics, and advocates, as well as sex workers of differing ages, genders, and sectors - to engage in a dialogue that challenges the dominant narratives surrounding the sex industry and advances the idea that sex work is in fact work. Presenting a variety of opinions and perspectives on such diverse topics as the social stigma of sex work, police violence, labour organizing, anti-prostitution feminism, human trafficking, and harm reduction, *Selling Sex* is an eye-opening, challenging, and necessary book."--Publisher's website.

Babies and Bosses - Reconciling Work and Family Life (Volume 4) Canada, Finland, Sweden and the United Kingdom Aug 04 2020 This study, part of a series on OECD countries, considers how a tax/benefit and childcare policies and workplace practices help determine parental labour market outcomes and may impinge on family formation in Canada, Finland, Sweden and the UK.

Call in Pinkerton's Feb 07 2021 Soon after Allan Pinkerton established his legendary detective agency in the United States, Canadians began seeking their services. *Call in Pinkerton's* is the history of the agency's work on behalf of Canadian governments and police forces. During the late nineteenth century and early twentieth century, Pinkerton's operatives hunted legendary train robber Bill Miner in the woods of British Columbia, infiltrated German spy rings during World War I, and helped future prime minister John A. Macdonald to fend off the Fenian raids. They tracked down the Reno Brothers in Windsor, Ontario, and investigated labour unrest in Hamilton. The agency's detectives countered crimes all over Canada, particularly in the West and British Columbia. Pinkerton's activities went as far north as the Yukon, where fears were growing of an imminent invasion by a force of Americans from Alaska. *Call in Pinkerton's* is the first book to chronicle the agency's work on behalf of Canadian governments and police forces. This entertaining book provides accounts of actual Pinkerton's investigations while detailing the day-to-day activities of a private detective at work. *Call in Pinkerton's* is a fascinating read for anyone with an interest in crime and espionage.

*Aspects Économiques Du Bénévolat Au Canada* Mar 30 2020 The objective of this study is to demonstrate some of the economic contributions made

by volunteer activity to Canadian society. When recognized at all, volunteer work is most often seen as isolated individual acts of charity; consequently, it remains largely outside the framework of policy decisions on the Canadian economy. This study shows that these individual efforts, taken as a whole, are not insignificant. It demonstrates this by converting the volume of volunteer activity into a dollar figure.

**Encyclopedia of Canadian Social Work** Jun 25 2022 All of us, as Canadians, are touched throughout our lives by some aspect of social welfare, either as recipients, donors, or taxpayers. But despite the importance of the social network in our country, there has been no single source of information about this critical component of our society. Even professionals in the field of social work or social services have not had a comprehensive volume addressing the myriad features of this critical societal structure. The Encyclopedia of Canadian Social Work fills this need. Over five hundred topics important to Canadian social work are covered, written by a highly diverse group of social workers covering all aspects of the field and all areas of the country. Practitioners, policy makers, academics, social advocates, researchers, students, and administrators present a rich overview of the complexity and diversity of social work and social welfare as it exists in Canada. The principal finding from this project underscores the long-held perception that there is a Canadian model of social work that is unique and stands as a useful model to other countries. The Encyclopedia of Canadian Social Work will be an important source of information, both to Canadians and to interested groups around the world. The Encyclopedia of Canadian Social Work is available in e-book version by subscription or from university and college libraries through the following vendors: Canadian Electronic Library, Ebrary, MyiLibrary, and Netlibrary.

**Labouring Canada** Jul 15 2021 Labouring Canada: Class, Gender, and Race in Canadian Working-Class History is a collection of 28 classic and contemporary essays exploring the complex interactions of class, gender, and race in the working lives of Canadians from the late eighteenth century to the present. The older classics lay the groundwork for the field of labour history in general, while the more recent contributions focus more specifically on issues of race, class, and gender. The range of topics examined is broad: from class relations in the fur trade, Aboriginal longshoremen in British Columbia, and racial discrimination against CNR porters to the negotiation of class in mid-1800s Nova Scotia, the Montreal teachers' strike of 1949, burlesque workers in 1970s BC, and the nature of the unpaid work performed by women in the home. Designed as a core text for undergraduate courses in labour history, this diverse collection provides an engaging and comprehensive introduction to the field. Readings are organized chronologically and thematically in eleven sections. Each section begins with an introduction that outlines the necessary historical context. Each section introduction includes a list of related resources. All essays have been edited and abridged to make them more accessible to undergraduate readers. Book jacket.

**No PhDs Please: This Is Canada: Dismal Employment and Earning Prospects of PhDs in an** Sep 16 2021 This book examines the value of a PhD in Canada from a broad perspective and is written in a format suitable for a wide audience: professionals, business executives, governments and policy makers. It is presented through self-explanatory charts. The book dispels the conventional wisdom that the highest possible education is always rewarded. Earnings of PhDs in Canada are very close to those with a Masters; their unemployment rate is even higher, quite opposite of their counterparts in the United States and OECD countries. A government report shows that a good number of them are driving taxis. There are three main reasons for the deplorable state of Canada's PhDs: declining academic positions due to continued budget cuts (universities being the main employer), antipathy of politicians who are decision makers in governments (the second major employer) toward facts and research, and the continuing risk-averse, traditional outlook of the Canadian business sector. Canada's private sector is at the bottom among competing OECD countries when it comes to R&D activities. It hires only 4% PhDs compared to the 42% hired by the private sector in the United States. Canada's economy is still predominantly resource based, as it was in the last century. About 60% of Canada's manufacturing and 70% of its top ten exports are resource related -- areas of the economy where there is hardly a need for PhDs. Future outlook for PhDs is not expected to be different. It is due to shrinking full time faculty positions, aversion of political masters towards science and research and mindset of private sector to be content with the continued traditional primary and resource based economic activities.

**Immigrants and the Labour Force** Oct 06 2020 In *Immigrants and the Labour Force*, Ravi Pendakur considers whether today's immigrants are more upwardly mobile than those who came to Canada earlier, whether they face discrimination in the labour force, and whether refusal to recognize credentials earned before migrating hurts life chances in the new country. He looks at the roles post-war immigrants have played in Canada's urban labour force and the ways these roles have changed in response to changes in intake policy and economic conditions, exploring these issues in the context of two changes that have dominated immigration and labour force patterns for the last fifty years. First, Canada's primary source for immigrants has shifted dramatically from the United Kingdom and Europe to countries outside Europe. Second, there has been a remarkable transformation in the nature of work: Canada's economy has changed from relying on resource extraction to an emphasis on manufacturing, and presently is emerging as post-industrial and knowledge-based. with an evaluation of the regulatory and policy changes that resulted from these discussions and an analysis of how the work of immigrants changed over a five-decade. He then provides both a political and quantitative analysis by looking at issues that affect not only immigrants but minorities born in Canada in order to assess the degree to which labour market discrimination exists and whether employment equity programs are needed.

Canada, A Working History Jan 01 2023 A deep exploration of the experience of work in Canada *Canada, A Working History* describes the ways in which work has been performed in Canada from the pre-colonial period to the present day. Work is shaped by a wide array of influences, including gender, class, race, ethnicity, geography, economics, and politics. It can be paid or unpaid, meaningful or alienating, but it is always essential. The work experience led people to form unions, aspire to management roles, pursue education, form professional associations, and seek self-employment. Work is also often in our cultural consciousness: it is pondered in song, lamented in literature, celebrated in film, and preserved for posterity in other forms of art. It has been driven by technological change, governed by laws, and has been the cause of disputes and the means by which people earn a living in Canada's capitalist economy. Ennobling, rewarding, exhausting, and sometimes frustrating, work has helped define who we are as Canadians.

Street Sex Work and Canadian Cities Nov 18 2021 “Our voices scrubbed out and forgotten. There are those who research and write about sex workers who often forget we are human.” —Amy Lebovitch Shawna Ferris gives a voice to sex workers who are often pushed to the background, even by those who fight for them. In the name of urban safety and orderliness, street sex workers face stigma, racism, and ignorance. Their human rights are ignored, and some even lose their lives. Ferris aims to reveal the cultural dimensions of this discrimination through literary and art-critical theory, legal and sociological research, and activist intervention. Canadian cities are striving for high safety ratings by eliminating crime, which includes “cleaning” urban areas of the street sex industry. Ironically, sex workers also want to live and work in a safe environment. Ferris questions these sanitizing political agendas, reviews exclusionary legislative and police initiatives, and examines media representations of sex workers. This book has much to offer to educators and activists, sex workers and anti-violence organizations, and academics studying women, cultural, gender, or indigenous issues.
